Herbert Howland Sargent (officier).), 1920 The Strategy on the Western Front, 1914-1918 ... With Maps Herbert Howland SARGENT, 1920 **The Strategy on the Western Front** Herbert Howland Sargent, 2014-06-02 An excerpt from a review in the Naval Institute Proceedings Volume 47 Issues 1 THE THREE ERRORS THERE were three great German offensives on the Western Front we are told in each of which Germany made a great strategical blunder the first Marne the Verdun campaign of 1916 and the offensive begun in March 1918 The first alleged error was in attempting the strategical offensive on two fronts at the same time The Western Front only one hundred and fifty miles long was protected by the Moselle and Metz backed by the Rhine and Strassburg it could not have been turned by France without violating the neutrality of Belgium or Switzerland Had Germany held this line defensively with a small part of her combatant forces while she defeated her other enemies in detail the war would not have lasted more than two years Thus the Germans would have avoided violating the neutrality of Belgium and the consequential British and American hostility The failure of the western offensive is attributed particularly to the strength of Belfort which commands the narrow pass into France between the Vosges and Jura ranges Had the Germans been able to capture this fortress Sargent says the way would have been opened for turning the Vosges and the fortresses of pinal Toul and Verdun and for the envelopment of the French right wing which with the left wing and the little British and Belgian armies already enveloped would no doubt have resulted in the final surrender of the French army and the capture of Paris The Second Error After the battle of the Marne Germany remained on the defensive on the Western Front for about eighteen months during which she was considerably outnumbered by the Allies She assumed the offensive in other parts of the theatre of war with

successful campaigns against the Russians and Serbians But before she had entirely disposed of Russia Serbia and Italy she again assumed the offensive in the West by way of the Crown Prince s tremendous campaign for Verdun one of the most formidable in history which failed This is charged as a mistake because with the same effort and less loss Germany could have completed her victories in the Eastern Front destroyed the army at Salonica and captured that important seaport then with greatly superior forces have struck and crushed the Italian army and then with all her enemies disposed of outside of France and Belgium have returned to the Western Front with an enormous preponderance of forces The Third Error After the failure at Verdun the Germans again consigned the West to the defensive role and resumed the offensive against Russia Romania and Italy But here again the Germans were not persistent for if they had massed their available forces in turn against Salonica and Italy probably both would have been disposed of the Germans would have occupied Greece and the valley of the Po and would have advanced to the French and Maritime Alps for an invasion of France via Nice Instead of following up her advantages in the Near East and in Italy Germany precipitated her offense of 1918 in the West beginning on March 21 with her powerful thrust at Amiens followed by the attack against the British around Ypres and two attacks against the French between Reims and Montdidier towards Chateau Thierry in none of which attacks was she able to make a sufficiently broad rupture in the line to allow resumption of a war of movement

Trial by Friendship David R. Woodward, 2014-10-17 During the crucial period of 1917-1918 the United States superseded Great Britain as the premier power in the world The differing strategic perspectives of London and Washington were central to the tensions and misunderstandings that separated the two dominant powers in 1918 and determined how these two countries would interact following the Armistice David R Woodward traces the projection of American military power to western Europe and analyzes in depth the strategic goals of the American political and military leadership in this first comprehensive study of Anglo American relations in the land war in Europe Based on extensive research in British and American archives the study focuses on Woodrow Wilson and David Lloyd George whose relationship was poisoned by the mutual suspicion and hostility generated by their disagreements over strategy and military policy President Wilson sought to use his country's military effort in western Europe as a tool to gain acceptance for his new diplomacy The British anxious over the Turkish German threat to Asia and their worsening manpower situation sought to utilize American military intervention for their own political military purposes Woodward's use of unpublished sources provides new perspectives on war leadership and his analysis of the British American interaction serves as a case study of the inevitable tension between national self interest and efforts at collective security even among nations that share many cultural and political values For historians and anyone interested in military history and World War I Trial by Friendship fills a gap in the study of Anglo American relations by providing a strong well written study on an area of American history that

The Field Artillery Journal ,1921 Arms, Economics and British Strategy G. C. Peden,2007-02-08 This book integrates strategy technology and economics and presents a new way of looking at twentieth century military history and Britain s decline as a great power G C Peden explores how from the Edwardian era to the 1960s warfare was transformed by a series of innovations including dreadnoughts submarines aircraft tanks radar nuclear weapons and guided missiles He shows that the cost of these new weapons tended to rise more quickly than national income and argues that strategy had to be adapted to take account of both the increased potency of new weapons and the economy s diminishing ability to sustain armed forces of a given size Prior to the development of nuclear weapons British strategy was based on an ability to wear down an enemy through blockade attrition in the First World War and strategic bombing in the Second and therefore power rested as much on economic strength as on armaments
