Strategy And Security In Northeast Asia:

Strategy and Security in Northeast Asia Richard B. Foster, James E. Dornan, 1979 **Strategy and Security in the Asia-Pacific** Robert Ayson, Desmond Ball, 2020-07-25 From the war on terror to the rise of China this book unlocks the major strategic themes and security challenges of the early twenty first century Strategy and Security in the Asia Pacific provides the analytical frameworks needed to make sense of this complex but exciting strategic universe Offering a unique mix of global strategic thinking and Asia Pacific security analysis this book is for readers from Sydney to Seoul who want to put their own local security challenges in a wider regional and global context It is also for North American and European readers requiring an understanding of the dynamic security developments in the Asia Pacific region around which so much of global strategy is increasingly based The really vital questions facing the international community are dealt with here Why do governments and groups still use armed force Has warfare really changed in the information age Why should we be concerned about non traditional security challenges such as water shortages and the spread of infectious disease Is a great clash imminent between the United States and China What are the prospects for peace on the Korean peninsula and between India and Pakistan Can Southeast Asia survive the challenges of transnational terrorism What does security mean for the Pacific island countries and for Australia and New Zealand With contributions from leading commentators and analysts Strategy and Security in the Asia Pacific offers a comprehensive and authoritative introduction to the field Power and Security in Northeast Asia Pyöng-guk Kim, Anthony Jones, 2007 As China s influence rises and the US attempts to retain its primacy in Northeast Asia the countries of the region are reconsidering their own security needs and availing themselves of new opportunities Power and Security in Northeast Asia explores the complexities of current security strategies in the region revealing motivations and policies not often considered by traditional international relations analyses The Changing Security Strategy of South Korea in Northeast Asia Byung-Ok Kil, 1996 **Southeast Asian Perspectives on Security** Derek Da Cunha, 2000 The conventional understanding of strategic issues in the modern world has been very much a Western driven phenomenon That is to say Western strategists thinkers and writers have tended to establish the principles of strategic concepts and to develop theories around them While there is utility in much Western strategic thought it is also apt to note that some of it does not have full relevance or validity when applied to a regional setting that is far removed from the geographical boundaries of the Western world In that connection this volume is partly intended to serve as an antidote to much of the Western commentary on Asia Pacific security issues by providing a range of perspectives on those issues from the Southeast Asian point of view It offers a range of Southeast Asian perspectives on the multifaceted security issues that confront the Asia Pacific region in the post Cold War era That there is no unitary perspective emanating from the region is symptomatic of the very fluid geopolitical situation that characterizes Asia Pacific security and of equal import the different schools of thought that analysts in the region have chosen to subscribe to *NORTHEAST ASIA--CULTURAL INFLUENCES*

ON THE U.S. NATIONAL SECURITY STRATEGY. Larry B. Rogers, 2022 **Asia-Pacific Strategic Relations** William T. Tow, 2001-12-10 This comprehensive 2002 book is an overview of security issues in the Asia Pacific It is also an argument for a strategy that promises to achieve greater regional stability It argues that current approaches by policy makers increase the likelihood of conflict Instead it proposes that a strategy of convergent security be adopted to build a more enduring and peaceful regional security framework A concise survey of key approaches to regional security politics it presents a vast selection of empirical discussion both historical and current Assessing the outlook for the three powers most likely to vie for regional dominance the United States China and Japan the book also reviews the prospects for other secondary powers including Korea and Taiwan and analyses the role of Australia and the ASEAN nations of Southeast Asia Unique accessible authoritative and broad ranging survey designed for a wide body of analysts and students of contemporary Asian politics and strategy 田口 洋子, 2005 Collective Defense Or Strategic Independence? Ted Galen Carpenter, 1989 Strategic Cultures and Security Policies in the Asia-Pacific Jeffrey S. Lantis, 2016-03-22 This book shows how one of the most powerful tools of security studies strategic culture illuminates the origins and implications of the Asia Pacific region s difficult issues from the rise of China and the American pivot to the shifting calculations of many other actors Strategic culture sometimes challenges and always enriches prevailing neo realist presumptions about the region It provides a bridge between material and ideational explanations of state behavior and helps capture the tension between neoclassical realist and constructivist approaches The case studies in this book survey the role of strategic culture in the behaviors of Australia China Japan the Philippines South Korea and the United States They show the contrast between structural expectations and cultural predispositions as realist geopolitical security threats and opportunities interact with domestic elite and popular interpretation of historical narratives and distinctive political military cultures to influence security policies The concluding chapter devotes special attention to methodological issues at the heart of strategic cultural studies as well as how culture may impact the potential for future conflict or cooperation in the region The result is a body of work that helps deepen our understanding of strategic cultures in the Asia Pacific in comparative perspective and enrich security studies This book was published as a special issue of *Contemporary Security Policy* Security Cooperation in Northeast Asia T.J. Pempel, Chung-Min Lee, 2012-06-14 Defining and conceptualizing Northeast Asia s security complex poses unique quandaries The security architecture in Northeast Asia to date has been predominately U S dominated bilateral alliances weak institutional structures and the current Six Party Talks dealing with the North Korean nuclear issue There has been a distinct lack of desire among regional countries as well as the U S to follow in the footsteps of Europe with its robust set of multilateral institutions However since the late 1990s there has been burgeoning interest among regional states towards forming new multilateral institutions as well as reforming and revitalizing existing mechanisms Much of this effort has been in the economic and political arenas with the creation of bodies such as the East Asian Summit but there have also been

important initiatives in the security sphere This book offers detailed examinations about how this potentially tense region of the world is redefining certain longstanding national interests and shows how this shift is the result of changing power relations the desire to protect hard won economic gains as well as growing trust in new processes designed to foster regional cooperation over regional conflict Presenting new and timely research on topics that are vital to the security future of one of the world s most important geographical regions this book will be of great value to students and scholars of Asian politics regionalism international politics and security studies *The Geopolitics of Australia's Regional Relations* D.

Rumley,2001-06-30 The origins of this book go back 30 years to the stimulation and interest generated by the political geography seminars led by John House at the University of Newcastle Upon Tyne I was very fortunate to graduate among its extremely capable sporty and enthusiastic class of 68 from where several academic geographers emerged Equally fortunately some of them and their predecessors had already blazed a trail to undertake graduate studies in Canada At the University of British Columbia I was supervised at different times by Julian Minghi and Victor Prescott both of whom are not only extremely capable academics but are also very fine people I owe an enormous debt to John Julian and Victor and to the British and Canadian taxpayers who provided financial support for my University studies In 1974 I began an academic career at the University of Western Australia where I have been ever since save for a two year period from 1991-3 as Professor of Australian Studies in the Department of International Relations at the University of Tokyo Viewing Australia and the Asia Pacific region from this different perspective within an extremely supportive Japanese environment had a profound impact I am especially grateful for the support provided by so many Japanese academic colleagues and friends beginning as early as 1976 Three individuals deserve special mention for their help guidance and enduring friendship George Ohshima Hiroshi Tanabe and Akihiro Kinda **Strategic Forum** ,1994 **Japan's Search for Strategic Security Partnerships** Gauri

Khandekar,Bart Gaens,2018-01-02 As tensions between China and Japan increase including over the disputed islands in the East China Sea Japan has adopted under Prime Minister Abe a new security posture This involves internally adapting Japan s constitutional position on defence and externally building stronger international relationships in the Asia Pacific region and more widely This book presents a comprehensive analysis of these developments It shows how trust and co operation with the United States the only partner with which Japan has a formal alliance is being rebuilt discusses how other relationships both on security and on wider issues are being formed in the region and with European countries and the EU with the relationships with India and Australia being of particular importance and concludes by assessing the likely impact on the region of Japan s changing posture and new relationships [Security Strategies of Middle Powers in the Asia Pacific](#) Ralf Emmers,Sarah Teo,2018-02-05 Security Strategies of Middle Powers in the Asia Pacific examines what drives the different regional security strategies of four middle powers in the Asia Pacific Australia Indonesia South Korea and Malaysia Drawing on the extant middle power literature the authors argue that the regional security strategies of middle powers could take two

forms namely functional or normative A functional strategy means that the middle power targets its resources to address a specific problem that it has a high level of interest in while a normative strategy refers to a focus on promoting general behavioural standards and confidence building at the multilateral level This book argues that whether a middle power ultimately employs a more functional or normative regional security strategy depends on its resource availability and strategic environment

Security Strategies in the Asia-Pacific A. Tan,2011-08-01 This book argues that given the existence of a discrete Malay archipelago security complex it is a fallacy for the United States to approach this region primarily through the prism of global counter terrorism

East Asia's Grand Strategies Ramon Pacheco Pardo,Jung H. Pak,2025 This is the first book to provide comparative analysis of the grand strategies of great middle and small powers across East Asia The contributors examine grand strategy as a state s pursuit of its long term interests using all available means East Asia is the pivotal region for twenty first century geopolitics and economics especially US China competition The volume is comprised of twelve chapters covering China Indonesia Japan Malaysia Myanmar North Korea Philippines Singapore South Korea Taiwan Thailand and Vietnam The volume brings together top experts on each country including scholars from many of the countries being examined Each chapter looks at both external and domestic variables that influence the country s grand strategy and the concluding chapter compares the twelve cases Furthermore the book heeds recent calls to expand the study of grand strategy beyond great powers
