**The Evolution of Human Sociality** Stephen K. Sanderson,2001 This text attempts a broad theoretical synthesis within the field of sociology and its closely allied sister discipline of anthropology It draws together these disciplines theoretical approaches into a synthesized theory called Darwinian conflict theory *The Collapse of Darwinism, Or, The Rise of a Realist Theory of Life* Graeme Donald Snooks,2003-01-01 In this provocative work noted social and economic theorist Graeme D Snooks exposes fatal flaws in the foundations of the Darwinian theory of evolution Further he develops a remarkable replacement theory of evolution The new dynamic strategy theory views life as a strategic pursuit rather than a

**Longrun Dynamics** G. Snooks,1998-04-08

Longrun Dynamics is a ground breaking work that begins where the author s Economics without Time 1993 left off It employs the inductive method proposed by J S Mill to develop a general dynamic theory that integrates the separate disciplines of economic growth economic fluctuations and political decision making The central feature of this general theory is dynamic demand which provides both a realist form for the model and a new explanation of macroeconomics variables The general theory also provides an entirely new basis for policy and is designed to counter the influence of neo liberalism in economic theory
