Martel, 2015-01-12 This book explores fundamental questions about grand strategy as it has evolved across generations and countries It provides an overview of the ancient era of grand strategy and a detailed discussion of its philosophical military and economic foundations in the modern era The author investigates these aspects through the lenses of four approaches those of historians social scientists practitioners and military strategists The main goal is to provide contemporary policy makers and scholars with a historic and analytic framework in which to evaluate and conduct grand strategy By providing greater analytical clarity about grand strategy and describing its nature and its utility for the state this book presents a comprehensive theory on the practice of grand strategy in order to articulate the United States past present and future purpose and position on the world stage *Alexander the Great: Lessons in Strategy* David J. Lonsdale, 2007-12-10 This book offers a strategic analysis of one of the most outstanding military careers in history identifying the most pertinent strategic lessons from the campaigns of Alexander the Great David Lonsdale argues that since the core principles of strategy are eternal the study and analysis of historical examples have value to the modern theorist and practitioner Furthermore as

strategy is so complex and challenging the remarkable career of Alexander provides the ideal opportunity to understand best practice in strategy as he achieved outstanding and continuous success across the spectrum of warfare in a variety of circumstances and environments This book presents the thirteen most pertinent lessons that can be learned from his campaigns dividing them into three categories grand strategy military operations and use of force Each of these categories provides lessons pertinent to the modern strategic environment Ultimately however the book argues that the dominant factor in his success was Alexander himself and that it was his own characteristics as a strategist that allowed him to overcome the complexities of strategy and achieve his expansive goals

The New Makers of Modern Strategy Hal Brands,2023-05-02 First published by Princeton in 1943 the collection of essays that constituted Makers of Modern Strategy has largely held the field as the key book that studied the means and ends of military power and thought and the historical figures that shaped that history The books in two editions have long been a staple of Princeton s backlist in international politics and strategic studies The first edition edited by Edward Mead Earle and subtitled Military Thought from Machiavelli to Hitler emerged out of a seminar of foreign policy and security experts organized between Princeton and the Institute of Advanced Study in reaction to World War II as a global conflict The subsequent edition edited by Peter Paret then at Stanford University was prepared in the early

1980s and subtitled *From Machiavelli to the Nuclear Age* In that edition three essays were reprinted from the earlier book four others were revised and the remainder twenty two essays were wholly new to reflect the updates in the field and also how the global political context had changed The two books together are regarded as the founding and leading text in military and strategic studies containing influential essays by many of the best known scholars of the subject The ambition of the new volume is to commission an entirely new edition of this classic reference work with 37 chapters organized into 5 sections covering key military leaders and the most important elements of strategic thinking since Thucydides and Sun Tzu The field of strategic and military history has witnessed an intellectual renaissance in recent decades as the number of strategic challenges faced by the world has grown enormously International politics has also changed The Cold War ended and the Soviet Union disappeared The United States entered a period of unipolarity only to see it challenged by the rise of new powers China in particular Terrorism civil wars so called rogue states insurgency and counter insurgency and cybersecurity all joined a growing list of strategic concerns New technologies promise to upend our understanding of conflict Furthermore scholars have learned more about earlier periods from the classic thinkers of strategy to the struggles of great power war to the dynamics of world politics during the Cold War Finally scholarship on international politics war and peace in the 20th century and after has become increasingly internationalized with the opening of new archives and the incorporation of new perspectives The aim of this volume is to serve as an overview and stimulant to research in this field one that encompasses the broader definitions of strategy in current research reflects the current state of world politics and also takes a more global and less Western perspective Publisher's description

The Airpower Advantage in Future Warfare: The Need for Strategy Colin S. Gray, 2012-08-04 The U S has long suffered from a serious strategy deficit In short there is a general crisis of strategic comprehension a lack of agreement on the most effective organizing ideas Airpower is by no means lonely in suffering from strategic theoretical uncertainty The study argues that the United States needs a theory of war and warfare It claims that future warfare will be diverse and that the tactical operational

and strategic value of airpower must always be situational A coherent theory of employment for all of airpower s capabilities not only the kinetic is needed Airpower s potential utility lies within a spectrum of possibilities and is dependent on context The study advises frank recognition of airpower s situational limitations Dr Colin S Gray is Professor of International Politics and Strategic Studies at the University of Reading in England Originally published by the Airpower Research Institute

Rethinking American Grand Strategy Elizabeth Borgwardt, Christopher McKnight Nichols, Andrew Preston, 2021-03-01

A comprehensive rethinking about the nature of American grand strategy in the past present and future **Parameters**

, 2008 **War and Geopolitics in Interwar Manchuria** Chi Man Kwong, 2017-03-06 In War and Geopolitics in Interwar Manchuria Kwong Chi Man revisits the civil wars in China 1925 1928 from the perspective of the often overlooked warlords who fought against the joint forces of the Nationalist and Communist parties In particular this work focuses on Zhang Zuolin the leader of the Fengian Clique who was sometimes seen as the representative of the Japanese interest in Manchuria Using primary and secondary sources from China Japan the United Kingdom and the United States this work tries to revisit the wars during the period from international political military and economic financial perspectives It sheds new light on Zhang Zuolin s decision to fight against the Nationalists and the Communists and offers an alternative explanation to the Nationalists temporary victory by revealing the central importance of geopolitics in the civil wars in China during the interwar period *Made, Not Born* Bruce Newsome, 2007-09-30 Why do the combat capabilities of individual soldiers vary

so much This book seeks to provide an answer to this and other questions about variability in combat performance Some soldiers flee quickly from the battlefield while others endure all hardships until the bitter end Some combat units can perform numerous types of missions while others cannot keep themselves organized during peacetime Some militaries armed with obsolete weapons have out fought enemies with the latest weapons just as some massively outnumbered armies have beaten back much larger opponents In this first social scientific study of the effectiveness of combat troops Newsome evaluates competing explanations for the varying combat capabilities and performances There are four main explanations each emphasizing the influence of a single factor The first focuses on material endowments How well funded are the troops Do they have the latest protective gear and the most advanced weaponry Second some analysts claim that democracies produce better commanders superior strategies more motivated personnel or better managed personnel others however associated those characteristics with more authoritarian forms of government Third is the idea that giving more power to the troops on the ground in individual combat units empowers them with decision making capability and adaptability to fast changing situations and circumstances Newsome presents evidence that decentralized personnel management does correlate with superior combat performance Fourth soldier capabilities and performance often are assumed to reflect intrinsic attributes such as prior civilian values Newsome argues that the capabilities of combat soldiers are acquired through military training and other forms of conditioning but he does not entirely discount the role of a soldier s individual character In the

age old nature vs nurture argument he finds that intrinsic qualities do count but that extrinsic factors such as training and environment matter even more

War, Peace, and Reconciliation Theodore R. Weber, 2015-11-11 War Peace and Reconciliation invites Christians and the churches into a conversation over how to think about war from a standpoint in faith It asks how reconciliation which is central to Christian life and doctrine can engage the realities of war without surrendering its fundamental affirmations It defines these realities politically by discussing the meanings of power peace as a particular organization of power and the international system The study of war and politics is unavoidable as is the engagement with reconciliation because all human existence and activity exist in the context of the gracious work of God to renew and reconcile the fallen creation The inquiry is theocentric and christocentric It culminates in a call to the churches to examine all their practices in the light of this perspective

A Cultural Strategy for Global Peace and Prosperity Gebhard Deissler, 2012-02-22 Research Paper postgraduate from the year 2012 in the subject Business economics Business Management Corporate Governance course Global Management language English abstract Si vis pacem para bellum versus Si vis pacem para pacem For times immemorial man has sought to achieve a state of freedom from outer conflict guided by the pole of the above continuum designated by the Ancient Romans as Si vis pacem para bellum translating as If you want peace prepare for war Those who deviated strongly from this implicit assumption by positioning themselves differently on the continuum and thereby reversed this logic were

disappointing the mainstream cultures of their eras and were considered out group personae non gratae by the dominant cultural players This study shows how the dilemma could be resolved
