**Stratification** Roger Keith Kelsall, Helen M. Kelsall, Lynne Chisholm, 1984 **Monographic Series** Library of Congress, 1975 **Women, Sport and Society in Modern China** Dong Jinxia, 2004-08-02 Drawing on Chinese sources hitherto unavailable in the West including official documents and interviews with top athletes the author explores the rise of Chinese super sportswomen and their relationship with politics culture and society before and during the Cultural Revolution and through China's transition to a market economy Quarterly Check-list of Ethnology and Sociology, 1974 Orders and Hierarchies in Late Medieval and Renaissance Europe Jeffrey Denton, 1999-06-30 Just as class is a key term for understanding modern Europe so hierarchy and order are the key terms for the earlier period These exceptional essays by some of the leading historians in the field are designed to allow students to get a better grasp on this critical subject Life in the late medieval and early modern periods was simply organized in a very different way to that of the industrial or post industrial society we are accustomed to Each essay tackles a different aspect of this European wide experience whether looking at the nobility the gentry the commons or the religious castes the contributors greatly increase our ability to understand the complex and fascinating phenomenon of how society ticks and how it is perceived by its members to tick

**Origins of Inequality in Human Societies** Bernd Baldus, 2016-07-28 Since the beginning of social life human societies have faced the problem how to distribute the results of collaborative activities among the participants The solutions they found ranged from egalitarian to unequal but caused more dissension and conflict than just about any other social structure in human history Social inequality also dominated the agenda of the new field of sociology in the 19th century The theories developed during that time still inform academic and public debates and inequality continues to be the subject of much current controversy Origins of Inequality begins with a critical assessment of classical explanations of inequality in the social sciences and the political and economic environment in which they arose The book then offers a new theory of the evolution of distributive structures in human societies It examines the interaction of chance intent and unforeseen consequences in the emergence of social inequality traces its irregular historical path in different societies and analyses processes of social control which consolidated inequality even when it was costly or harmful for most participants Because the evolution of distributive structures is an open process the book also explores issues of distributive justice and options for greater equality in modern societies Along with its focus on social inequality the book covers topics in cultural evolution social and economic history and social theory This book will appeal to scholars and advanced students of sociology economics and anthropology in particular sociological theory and social inequality **Inequality: Structures, Dynamics and Mechanisms** Arne L. Kalleberg, Stephen L. Morgan, John Myles, Rachel A. Rosenfeld (Deceased), 2004-12-04 Aage Sorensen was an influential intellectual presence who was one of the world's leading authorities on social stratification and the sociology of education His research sought to understand the structures dynamics and mechanisms that underlie inequalities in industrial societies by

focusing on how individuals attainments are shaped by characteristics of a society's or organization's opportunity structure on the one hand and individuals' education experience and other human capital resources on the other. He emphasized inequalities associated with education and schooling, class and stratification outcomes such as income and occupational status. Within these general foci, he tackled the study of phenomena as diverse as rates of learning in elementary school reading groups and promotion patterns in large industrial corporations. The chapters of this volume illustrate some of the major themes that characterized Ager's research; these topics are also likely to constitute important concerns for future efforts to understand structured social inequality in society. These themes include the development of explicit dynamic models to account for observed patterns of education, career and labor market outcomes; aspects of educational inequality such as school effects and learning opportunities; issues related to intragenerational mobility and careers; and the role of rents in generating structural inequality. *China's Social Policy* Isaac Ascher, 1976 **Social Mobility and Political Attitudes** Frederick C. Turner, This volume provides a fundamental rethinking of the old literature on mobility and politics and a reassessment of interpretive schemes based upon it. Turner's findings indicate that much is to be learned from subjecting even cherished assumptions to the rigors of survey research and analytical techniques. *Books in Series*, 1980

**The British National Bibliography** Arthur James Wells, 1974 **Library of Congress Catalogs** Library of Congress, 1976 **Modern Reconstruction of Classical Thought** Jeffrey Alexander, 2014-04-03 In this volume the author maintains that sociology must learn to combine the insights of both Durkheim and Marx and that it can only do so on the presuppositional ground that Weber set forth. Alexander maintains that the idealist and materialist traditions must be transformed into analytic dimensions of multidimensional and synthetic theory. This volume focusses on the writing of Talcott Parsons, the only modern thinker who can be considered a true peer of the classical founders and examines his own profoundly ambivalent attempt to carry out this analytic transformation. *Handbook of Classical Sociological Theory* Seth Abrutyn, Omar Lizardo, 2021-11-01 This is the first handbook focussing on classical social theory. It offers extensive discussions of debates, arguments and discussions in classical theory and how they have informed contemporary sociological theory. The book pushes against the conventional classical theory pedagogy which often focused on single theorists and their contributions and looks at isolating themes capturing the essence of the interest of classical theorists that seem to have relevance to modern research questions and theoretical traditions. This book presents new approaches to thinking about theory in relationship to sociological methods. **Books in Series, 1876-1949** R.R. Bowker Company, 1982 **List of Titles Added to the Catalogue** University of London. School of Oriental and African Studies. Library, 1981 *Race, Class, and the State in Contemporary Sociology* Jack Niemonen, 2002 Situating Wilson's work on race and class in the overall contexts of sociology and radical politics, this book considers the contribution of and the debate surrounding each of his major works including *The Declining Significance of Race*, *The Truly Disadvantaged* and *When Work Disappears*. The crucial place of

segregation in the critiques of Wilson's theory is emphasized and the role of the state is considered. Annotation copyrighted by Book News Inc Portland OR      Sociological Abstracts Leo P. **Citizen Rights, Migrant Rights and Civic Stratification** Lydia Morris, 2024-07-05 This book explores the concept of civic stratification and examines its contemporary relevance for analysis and understanding of the functioning of rights in society. David Lockwood's 1996 concept of civic stratification outlines the way in which the rights associated with citizenship can be a source of inequality by virtue of their formal granting or denial by the state or by informal impediments to their full realisation. The purpose of this book is to explore the meaning and significance of this concept and elaborate its potential in offering a framework for understanding the dynamic nature of rights. Lockwood's model reverses Marshall's 1950 view of citizenship as guaranteed inclusion in society and is linked to the way that the differential entitlement and the qualifying conditions associated with certain rights can be harnessed as a means of control. While both Marshall and Lockwood were principally concerned with the rights attaching to citizenship, this book extends the insights of these two authors to show how such controls apply in various ways to both citizens and non-citizens alike. Building on Lockwood's conception of moral resources, the book sets out a theoretical framework and empirical illustration of how the position of different groups within society is subject to shifting perceptions of social worth and is engaged both in claims to fuller access to rights and in justifications of their denial or removal. This book will appeal to scholars and higher level students with relevant interests in sociolegal studies, sociology, social policy and politics.
