art has been a vehicle for political discourse in the Middle East and has generated much discussion in both the popular media and academia Yet this conversation has generalised street art and identified it as a singular form with identical styles and objectives throughout the region Street art's purpose is however defined by the socio cultural circumstances of its production Middle Eastern artists thus adopt distinctive methods in creating their individual work and responding to their individual environments Here in this new book Sabrina De Turk employs rigorous visual analysis to explore the diversity of Middle Eastern street art and uses case studies of countries as varied as Egypt Tunisia Lebanon Palestine Bahrain and Oman to illustrate how geographic specifics impact upon its function and aesthetic Her book will be of significant interest to scholars specialising in art from the Middle East and North Africa and those who bring an interdisciplinary perspective to Middle East studies

*Street Art, Public City* Alison Young, 2013-11-20 What is street art Who is the street artist Why is street art a crime Since the late 1990s a distinctive cultural practice has emerged in many cities street art involving the placement of uncommissioned artworks in public places Sometimes regarded as a variant of graffiti sometimes called a new art movement its practitioners engage in illicit activities while at the same time the resulting artworks can command high prices at auction and have become collectable aesthetic commodities Such paradoxical responses show that street art challenges conventional understandings of culture law crime and art Street Art Public City Law Crime and the Urban Imagination engages with those paradoxes in order to understand how street art reveals new modes of citizenship in the contemporary city It examines the histories of street art and the motivations of street artists and the experiences both of making street art and looking at street art in public space It considers the ways in which street art has become an integral part of the identity of cities such as London New York Berlin and Melbourne at the same time as street art has become increasingly criminalised It investigates the implications of street art for conceptions of property and authority and suggests that street art and the urban imagination can point us towards a different kind of city the public city
