Streets of Conflict , *Globalizing the Streets* Fabiola Salek, David C. Brotherton, 2008-06-24 Not since the 1960s have the activities of resistance among lower and working class youth caused such anxiety in the international community Yet today the dispossessed are responding to the challenges of globalization and its methods of social control The contributors to this volume examine the struggle for identity and interdependence of these youth their clashes with law enforcement and criminal codes their fight for social political and cultural capital and their efforts to achieve recognition and empowerment Essays adopt the vantage point of those whose struggle for social solidarity self respect and survival in criminalized or marginalized spaces In doing so they contextualize and humanize the seemingly senseless actions of these youths who make visible the class contradictions social exclusion and rituals of psychological humiliation that permeate their everyday lives

*Streets, Railroads, and the Great Strike of 1877* David O. Stowell, 1999-06 For one week in late July of 1877 America shook with anger and fear as a variety of urban residents mostly working class attacked railroad property in dozens of towns and cities The Great Strike of 1877 was one of the largest and most violent urban uprisings in American history Whereas most historians treat the event solely as a massive labor strike that targeted the railroads David O Stowell examines America's predicament more broadly to uncover the roots of this rebellion He studies the urban origins of the Strike in three upstate New York cities Buffalo Albany and Syracuse He finds that locomotives rumbled through crowded urban spaces sending panicked horses and their wagons careening through streets Hundreds of people were killed and injured with appalling regularity The trains also disrupted street traffic and obstructed certain forms of commerce For these reasons Stowell argues The Great Strike was not simply an uprising fueled by disgruntled workers Rather it was a grave reflection of one of the most direct and damaging ways many people experienced the Industrial Revolution Through meticulously crafted case studies the author advances the thesis that the strike had urban roots that in substantial part it represented a community uprising A particular strength of the book is Stowell's description of the horrendous accidents the toll in human life and the continual disruption of craft business and ordinary movement engendered by building railroads into the heart of cities Charles N Glaab

**Street Crime** Simon Hallsworth, 2013-06-17 Street crime remains high on the public and political agenda and is frequently the subject of media attention and concern This book aims to provide a detailed and accessible account of the phenomenon placing the subject in its theoretical historical and political context It addresses the question of how serious a problem street crime really is and why it has become such a hot political issue The book draws upon contemporary debates about the supposed presence of an emerging underclass and in particular the criminalisation and racialisation of black communities with whom it has come to be particular associated in the public mind The author then develops a framework of analysis which focuses upon the relationship of three key variables the production of motivated offenders the availability and suitability of victims and a study of the limits inherent in current control strategies Finally the book concludes that a successful prevention strategy requires an agenda for revitalising the public sphere in inner city areas rather than reliance policies of situational crime prevention zero tolerance policing and increased punishment
