The Politics of the Euro-Zone Kenneth Dyson, 2000-09-28 The Euro Zone represents the single most important step in European Integration since 1957 and one of the boldest economic monetary and political projects in modern history In this first major study the author examines the major political questions raised by the birth of the Euro Zone on January 1 1999 and argues for a more politically informed analysis and assessment of its nature operation and prospects How does the Euro Zone operate What does it mean for European States and for the political strategies of governments How is its operation to be explained What are its prospects for stability What kinds of policies are needed to strengthen its capacity to withstand crisis The book stresses the ECB centric nature of the Euro Zone and its implications both for policy and policies in Europe and for theories of integration The ECB emerges as a powerful policy pusher and ideational leader with an authority and power exceeding that of the European Commission in the integration process Dyson examines the related problems of social justice democratic consent and identity He also argues that the Euro Zone represents a process of transition to the EU as a stabilization Staten An innovative aspect of the book is its application of a strength strain model for the purpose of analyzing and assessing the stability of the Euro Zone It concludes that the stability of the Euro Zone will be strongly conditioned by three factors how Kantian rather than Hobbesian or Lockean its political culture proves to be with a key reproducibility failing here on the quality of political leadership its possession of policy interments to tackle liquidity as well as debt traps and the speed and efficiency of mechanisms of benchmarking policy transfer and lesson drawing
