

STRESS MANAGEMENT

For Healthcare Workers

Jobs are the leading cause of stress in adults' lives, and research shows that employees in the healthcare industry are the most stressed of all. If you are a healthcare worker, here are some ways you can reduce stress levels at work.*

1 TRACK YOUR TRIGGERS

The first step is identifying where your stressors come from. Is it a certain situation, a particular coworker, or a patient behavior? Keeping track your stressors can help you recognize patterns and avoid a stress response altogether.

2 USE TALK THERAPY

Sometimes, talking things out and venting a little can help with stress tremendously. Whether you're talking to a coworker or even a hospital chaplain or therapist, taking a minute to get something off your chest and let yourself be comforted can be beneficial.

3 TAKE A BREAK

When you're extremely stressed at work, you may do or say things you normally wouldn't due to your frustration. It's important to take a moment to remove yourself from the situation (if you can), be alone, and take a breather to recharge.

4 FOCUS ON THE POSITIVE

It's been proven that the way you think influences how you feel overall. Engaging in positive and constructive self-talk and trying to keep an optimistic outlook is a step in the right direction to reducing stress.

5 TAKE CARE OF YOURSELF

Your overall health and physical condition can really influence how well you manage stress. Exercise, a balanced diet, and getting enough sleep can aid in improving your physical and mental health. Take time for activities outside of work to promote a healthy work-life balance.
