networks you might not otherwise get Another reason might be morale Employees with close friends at work reported being in a good mood more often which could spill over into positive effects on the work being performed If you do choose to build stronger connections at work take the time to ask people about themselves and their lives I've been consistently surprised when I get to know people better everyone has an interesting story You'll often find common ground new respect and compassion for others

more comprehensive actions which target both the organization and the individual worker as intervention points for stress reduction Collectively labeled as stress management methods such as muscle relaxation meditation biofeedback and cognitive strategies have been taught to workers as a means of reducing psycho physiological and subjective distress These preventative strategies have focused exclusively on the healthy individual worker As presently defined stress management has a negligible role in reducing organizational stress The authors suggest that a more appropriate application would be a complement to job redesign or organizational change intervention They also argue that conceptual issues are as important as logistical ones in determining program success The book is divided into three parts Part I deals with organizational stress and its assessment Part II describes aspects of stress management as applied in work settings and the third part is a collection of resources for training materials products and equipment Stress Management in Work Settings is a professional book aimed at the users who will ultimately make the decision to offer a stress reduction program decide what type of action will be taken and actually implement the action
