## Strictures Of Inheritance:

**The Strictures of Inheritance** Jan Luiten van Zanden, Arthur van Riel, 2004-04-18 A major feat of research and synthesis this book presents the first comprehensive history of the Dutch economy in the nineteenth century an important but poorly understood piece of European economic history Based on a detailed reconstruction of extensive economic data the authors account for demise of the Dutch economy s golden age After showing how institutional factors combined to make the Dutch economy a victim of its own success the book traces its subsequent emergence as a modern industrial economy Between 1780 and 1914 the Netherlands went through a double transition Its economy which in the words of Adam Smith was approaching a stationary state in the eighteenth century entered a process of modern economic growth during the middle decades of the nineteenth At the same time the country s sociopolitical structure was undergoing radical transformation as the decentralized polity of the republic gave way to a unitary state As the authors show the dramatic transformation of the Dutch political structure was intertwined with equally radical changes in the institutional structure of the economy The outcome of this dual transition was a rapidly industrializing economy on one side and on the other the neocorporatist sociopolitical structure that would characterize the Netherlands in the twentieth century Analyzing both processes with a focus on institutional change this book argues that the economic and political development of the Netherlands can be understood only in tandem Colonialism, Institutional Change, and Shifts in Global Labour Relations Karin Hofmeester, Pim Zwart, 2025-10-01 This book offers a view of shifts in labour relations in various parts of the world over a breathtaking span from 1500 to 2000 with a particular emphasis on colonial institutions How did growing demand for colonial commodities affect labour in the Global South How did colonial interference with land and labour markets affect developments in labour relations And what were the effects of the introduction of colonial currencies The contributors to this volume answer those questions and more combining global perspectives with impressively detailed case studies Whose Body is it Anyway? Cécile Fabre, 2006-04-06 In the prevailing liberal ethos if there is one thing that is beyond the reach of others it is our body in particular and our person in general our legal and political tradition is such that we have the right to deny others access to our person and body even though doing so would harm those who need personal services from us or body parts However we lack the right to use ourselves as we wish in order to raise income even though we do not necessarily harm others by doing so even though we might in fact benefit them by doing so Cécile Fabre s aim in this book is to show that according to the principles of distributive justice which inform most liberal democracies both in practice and in theory it should be exactly the other way around that is if it is true that we lack the right to withhold access to material resources from those who need them we also lack the right to withhold access to our body from those who need it but we do under some circumstances have the right to decide how to use it in order to raise income More specifically she argues in favour of the confiscation of body parts and personal services as well as of the commercialization of organs sex and reproductive capacities

State, Economy and the Great Divergence Peer Vries, 2015-02-26 *State Economy and the Great Divergence* provides a new analysis of what has become the central debate in global economic history the great divergence between European and Asian growth Focusing on early modern China and Western Europe in particular Great Britain this book offers a new level of detail on comparative state formation that has wide reaching implications for European Eurasian and global history Beginning with an overview of the historiography Peer Vries goes on to extend and develop the debate critically engaging with the huge volume of literature published on the topic to date Incorporating recent insights he offers a compelling alternative to the claims to East West equivalence or Asian superiority which have come to dominate discourse surrounding this issue This is a vital update to a key issue in global economic history and as such is essential reading for students and scholars interested in keeping up to speed with the on going debates

*Trials of Convergence* Arthur van Riel, 2021-06-22 For over a century now historians have debated the causes of the lagged industrialization of the Dutch economy during the nineteenth century To this debate *Trials of Convergence* brings the analytical perspective of prices factor costs and the functioning of markets Its critical insight is that only an approach based on the integrated incentive structure of the economy allows us to delimit the role of alternative explanations Using statistical reconstruction and microdata it shows that the retarded transition resulted from a confluence of forces These ranged from open economy effects and natural endowments to the resilient influence of the institutions of the former Dutch Republic and the fiscal policy adopted in response to Belgian secession At the height of the British Industrial Revolution the Dutch economy slowed triggering a return to the problems of eighteenth century stagnation All this meant that the transition to modern economic growth after 1860 came about only in a changed international context and after a period of politico economic reform

**The Dynamics of Inheritance on the Shakespearean Stage** Michelle M. Dowd, 2015-05-19 The first full length study of the ways in which Shakespearean drama influenced and expanded notions of inheritance in early modern England

Promises and Predicaments Alicia Schrikker, Jeroen Touwen, 2015-03-30 Indonesia s trajectory towards successful economic growth has been long and capricious Studies of the process often focus either on the Netherlands Indies or independent Indonesia suggesting the existence of fundamental discontinuities The authors of the 17 essays in this book adopt a long term perspective that transcends regimes and bridges dualist economic models in order to examine what did and did not change as the country moved across the colonial postcolonial divide and shifted from reliance on exports of primary products to a multi centred economy The aim is to analyse how economic development grew out of the interplay of foreign trade new forms of entrepreneurship and the political economy The authors deal with entrepreneurship and economic specialization within different ethnic groups the geographical distribution of exports and resource drains from exporting regions and connections between an export economy and mass poverty One recurring issue is the way actors from different ethnic groups occupied complementary niches highlighting the rich variety of roles played by Asian entrepreneurs A study of the international sugar

trade shows how regime change fostered co operation between different ethnic groups and nationalities involved with trading networks inter island shipping urban public transport and the construction sector A comparison of export earnings and population groups involved in trade before and after 1900 shows that unexpected agricultural and industrial transitions could underpin a fundamental shift in income growth with improved living standards for broad sectors of the population

**The Politics of Urban Water** Kimberley Kinder,2015 Kimberley Kinder explores how active residents in Amsterdam deployed their cityscape when rallying around civic concerns turning space into a vehicle for social reform Amsterdam s development serves as both an inspiration and a cautionary tale for cities across Europe and North America where rapid new growth creates similar pressures

**The Orphan in Eighteenth-Century Law and Literature** Cheryl L. Nixon,2016-02-17 Cheryl Nixon s book is the first to connect the eighteenth century fictional orphan and factual orphan emphasizing the legal concepts of estate blood and body Examining novels by authors such as Eliza Haywood Tobias Smollett and Elizabeth Inchbald and referencing never before analyzed case records Nixon reconstructs the narratives of real orphans in the British parliamentary equity and common law courts and compares them to the narratives of fictional orphans The orphan s uncertain economic familial and bodily status creates opportunities to plot his or her future according to new ideologies of the social individual Nixon demonstrates that the orphan encourages both fact and fiction to re imagine structures of estate property and inheritance blood familial origins and marriage and body gender and class mobility Whereas studies of the orphan typically emphasize the poor urban foundling Nixon focuses on the orphaned heir or heiress and his or her need to be situated in a domestic space Arguing that the eighteenth century constructs the valued orphan Nixon shows how the wealthy orphan became associated with new understandings of the individual New archival research encompassing print and manuscript records from Parliament Chancery Exchequer and King s Bench demonstrate the law s interest in the propertied orphan The novel uses this figure to question the formulaic structures of narrative sub genres such as the picaresque and romance and ultimately encourage the hybridization of such plots As Nixon traces the orphan s contribution to the developing novel and developing ideology of the individual she shows how the orphan creates factual and fictional understandings of class family and gender

**The Invisible Hand?** Bas van Bavel,2019-04-29 The Invisible Hand offers a radical departure from the conventional wisdom of economists and economic historians by showing that factor markets and the economies dominated by them the market economies are not modern but have existed at various times in the past They rise stagnate and decline and consist of very different combinations of institutions embedded in very different societies These market economies create flexibility and high mobility in the exchange of land labour and capital and initially they generate economic growth although they also build on existing social structures as well as existing exchange and allocation systems The dynamism that results from the rise of factor markets leads to the rise of new market elites who accumulate land and capital and use wage labour extensively to make their wealth profitable In the long term this creates social polarization and a

decline of average welfare As these new elites gradually translate their economic wealth into political leverage it also creates institutional sclerosis and finally makes these markets stagnate or decline again This process is analysed across the three major pre industrial examples of successful market economies in western Eurasia Iraq in the early Middle Ages Italy in the high Middle Ages and the Low Countries in the late Middle Ages and the early modern period and then parallels drawn to England and the United States in the modern period These areas successively saw a rapid rise of factor markets and the associated dynamism followed by stagnation which enables an in depth investigation of the causes and results of this process

**Laws of Inheritance** Elizabeth Brodersen,2015-08-14 Instilled in interdisciplinary cross cultural perspectives of mythical socio economic literary pedagogic and psychoanalytic representations two archetypal creative inheritance laws interact as twins Eros fusion containment safety and Thanatos division separation risk Hypothesising these twin laws as matrilineal Eros and patrilineal Thanatos this book explores why cross cultural forms including gender traits are not fixed but are instead influenced by earlier flexible matrilineal forms Through a study of twins on macro and micro levels Elizabeth Brodersen argues that a psychological twin dilemma is implicit in inheritance laws and offers a unique forum to show how each law competes for primacy as the first and other Chapters begin by looking at twins in creation myths and the historical background to the laws of inheritance as well as literary representations The book then moves on to the developmental structures imbued in twin research and educational systems to explore how past cultural forms have been re defined to fit a modern landscape and the subsequent movement away from the importance of patrilineal primogeniture Laws of Inheritance will be of key value to academics researchers and postgraduate students in the fields of psychoanalysis psychotherapy archetypal theory cross cultural depth psychology cultural anthropology sociology gender studies and twin research The book will also be of interest to practicing psychoanalysts and psychotherapists Wealth Shaping Laws Amelia Scott,AI,2025-02-21 Wealth Shaping Laws examines how inheritance laws influence wealth distribution a critical intersection of economics and politics The book reveals that these laws are not neutral they actively shape who benefits from accumulated capital often exacerbating economic inequality Did you know that specific legal provisions like estate taxes and trust laws have a profound impact on the transfer of wealth across generations By exploring the legal architecture of inheritance the book challenges the idea that wealth is solely the result of individual merit The book progresses systematically first introducing fundamental legal and economic concepts related to inheritance It then analyzes specific legal instruments such as wills and trusts using case studies from different countries to illustrate diverse approaches and their economic consequences Finally it delves into the broader societal implications including effects on social mobility economic opportunity and political power This unique approach combines rigorous legal analysis with economic modeling offering concrete policy recommendations for a more equitable society **The Muslim Law of Succession, Inheritance, and Waqf in Sri Lanka** M. S. Jaldeen,1993 **Bountiful Island** David Damas,1994-11-29 In Bountiful Island a major Arctic

scholar turns his eye on Micronesia the small and isolated atoll of Pingelap in Micronesia lies in a moist climatic belt which encourages abundant plant life including such food plants as coconuts breadfruit and taro In this detailed examination of land tenure practices in the atoll David Damas argues that the resulting high level of subsistence has brought an expansion of the population which has put great pressures on land Under these pressures land tenure has moved from communal usage to lineage control to individual ownership and transmission rights Comparative material from neighbouring Mwaekil atoll indicates the same general succession from larger to smaller units of tenure with increasing population While control of land by kin groups is usual in the Pacific other atoll societies show examples of individual tenure which also relate to changes in population densities Subsequent depopulation and emigration have not altered the fundamentals of the land tenure system but have led to the emergence of a pattern of land stewardship This has resulted in imbalances between the holdings of resident cultivators and those of absentee landowners Comparative material from neighbouring Mwaekil atoll indicates the same general succession from larger to smaller units of tenure with increasing population While control of land by kin groups is usual in the Pacific other atoll societies show examples of individual tenure which also relate to changes in population densities Bountiful Island will be of interest to all anthropologists studying cross cultural comparisons in the theory of land tenure practices and the ethnology social anthropology and ethnohistory of Micronesia This book is also suitable for senior undergraduate and graduate courses in cultural ecology and area courses on the Pacific

**Christianity, Plasticity, and Spectral Heritages** Victor E. Taylor, 2017-07-20 This book is an interdisciplinary study of the cultural representations of Jesus in the context of contemporary religious theory and continental philosophy It looks at Jesus in view of an updated Derridean hauntology and spectrality with an emphasis on the inherent plasticity of the Christian heritage While the work engages with the recent Jesus centered writings of Slavoj i ek Fran ois Laruelle and Giorgio Agamben it places a greater and much needed emphasis on the philosophical theological and cultural links between a plastic hauntological Christian heritage and Jesus s historically evolving plural subjectivity with the latter explored in texts of popular culture It is a multidisciplinary study of Jesus as well as a dynamic Christian heritage that simultaneously constructs and deconstructs Jesus s philosophical political and cultural centrality
