Studies In Canadian Geography The North:

Canadian Geography Thomas A. Rumney, 2009-12-10 *Canadian Geography A Scholarly Bibliography* is a compendium of published works on geographical studies of Canada and its various provinces. It includes works on geographical studies of Canada as a whole, on multiple provinces, and on individual provinces. Works covered include books, monographs, atlases, book chapters, scholarly articles, dissertations, and theses. The contents are organized first by region into main chapters, and then each chapter is divided into sections: General Studies, Cultural and Social Geography, Economic Geography, Historical Geography, Physical Geography, Political Geography, and Urban Geography. Each section is further subdivided into specific topics within each main subject. All known publications on the geographical studies of Canada in English, French, and other languages covering all types of geography are included in this bibliography. It is an essential resource for all researchers, students, teachers, and government officials needing information and references on the varied aspects of the environments and human geographies of Canada.

Canada and the Idea of North Sherrill E. Grace, 2002-04-15 *Canada and the Idea of North* examines the ways in which Canadians have defined themselves as a northern people in their literature, art, music, drama, history, geography, politics, and popular culture. From the Franklin Mystery to the comic book superheroine Nelvana, Glenn Gould's documentaries, the paintings of Lawren Harris, and Molson beer ads, the idea of the north has been central to the Canadian imagination. Sherrill Grace argues that Canadians have always used ideas of Canada as North to promote a distinct national identity and national unity. In a penultimate chapter, *The North Writes Back*, Grace presents newly emerging northern voices and shows how they view the long tradition of representing the North by southern activists, artists, and scholars. With the recent creation of Nunavut, increasing concern about northern ecosystems, and social challenges, and renewed attention to Canada's role as a circumpolar nation, *Canada and the Idea of North* shows that nordicity still plays an urgent and central role in Canada at the start of the twenty-first century.

Northern Exposures Peter Geller, 2011-11-01 To many, the North is a familiar but inaccessible place. Yet images of the region are within easy reach in magazine racks, on our coffee tables, and on television, computer, and movie screens. In *Northern Exposures*, Peter Geller uncovers the history behind these popular conceptions of the Canadian North. This book examines the photographic and film practice of the Canadian government, the Anglican Church of Canada, and the Hudson's Bay Company, the three major colonial institutions involved in the Arctic and sub-Arctic. In the first half of the twentieth century, visual representations of the region were widely circulated in official publications and presented in film shows and lantern slide lectures. Focusing on the work of prominent and prolific northern image makers, including federal government special investigator Major Lachlan T. Burwash, first Bishop of the Arctic Archibald Lang Fleming, Beaver magazine editor and publicity expert Douglas McKay, and photographer/filmmaker/author Richard Finnie, this book engages in a contextual approach to reading images, analyzing the interrelated aspects of production, circulation, and reception. Geller reveals the

varied ways in which taking and displaying pictures of northern people and places contributed to the extension of control over the northern reaches of the Canadian nation Illustrated throughout with archival photographs Northern Exposures contributes to understandings of twentieth century visual culture and the relationship between photographic ways of seeing and the expansion of colonial power while raising important questions about the role of visual representation in understanding the past It will be of interest to those concerned with Canadian and cultural history Northern and Aboriginal studies film and communication art history anthropology and visual culture **Frontier Science** Matthew S. Wiseman,2024-03-26 Between 1945 and 1970 Canada's Department of National Defence sponsored scientific research into the myriad challenges of military operations in cold regions To understand and overcome the impediments of the country's cold climate scientists studied cold weather acclimatization hypothermia frostbite and psychological morale for soldiers assigned to active duty in northern Canada Frontier Science investigates the history of military science in northern Canada during this period of the Cold War highlighting the consequences of government funded research for humans and nature alike The book reveals how under the guise of environmental protection research the Canadian military sprayed pesticides to clear bushed areas used radioactive substances to investigate vector borne diseases pursued race based theories of cold tolerance and enabled wide ranging tests of newly developed weapons and equipment In arguing that military research in northern Canada was a product of the Cold War Matthew S Wiseman tackles questions of government power scientific authority and medical and environmental research ethics Based on a long and deep pursuit of declassified records archival sources and oral testimony Frontier Science is a fascinating new history of military approaches to the human nature relationship *CCF Colonialism in Northern Saskatchewan* David Quiring,2007-10 An elegantly written history that documents the colonial relationship between the CCF and the Saskatchewan north Canadian Plains Studies ,1973 Saskatchewan Bernard D. Thraves,2007 Saskatchewan Geographic Perspectives is Saskatchewan's first comprehensive geography textbook Its major sections cover these themes Physical Geography Historical and Cultural Geography Population and Settlement and Economic Geography Eighteen chapters provide an excellent overview of the province from a variety of geographic perspectives while twenty nine focus studies explore specific topics in depth presents the work of forty three scholars and is well illustrated with more than 150 figures 70 tables and over 60 full colour plates It also includes full reference lists and a comprehensive index Although prepared specifically for use in post secondary geography programs this book is also appropriate for high school research projects and for anyone interested in the many facets of this vast and varied province Googlebooks *Landscapes and Landforms of Western Canada* Olav Slaymaker,2016-12-01 This is the only book to focus on the geomorphological landscapes of Canada West It outlines the little appreciated diversity of Canada's landscapes and the nature of the geomorphological landscape which deserves wider publicity Three of the most important geomorphological facts related to Canada are that 90% of its total area emerged from ice sheet cover relatively recently from

a geological perspective permafrost underlies 50% of its landmass and the country enjoys the benefits of having three oceans as its borders the Arctic Pacific and Atlantic oceans Canada West is a land of extreme contrasts from the rugged Cordillera to the wide open spaces of the Prairies from the humid west coast forests to the semi desert in the interior of British Columbia and from the vast Mackenzie river system of the to small steep cascading streams on Vancouver Island The thickest Canadian permafrost is found in the Yukon and extensive areas of the Cordillera are underlain by sporadic permafrost side by side with the never glaciated plateaus of the Yukon One of the curiosities of Canada West is the presence of volcanic landforms extruded through the ice cover of the late Pleistocene and Holocene epochs which have also left a strong imprint on the landscape The Mackenzie and Fraser deltas provide the contrast of large river deltas debouching respectively into the Arctic and Pacific oceans **Manitoba School Journal** ,1949
