Confidentiality of Electronic Health Data ,1996 Data Protection and Confidentiality in Health Informatics Commission of the European Communities,1991 Title Page Preface Table of Contents EXECUTIVE SUMMARY The Individual Society and the Protection of Personal Data The European Challenge in Health Information Systems Medical Requirements in Data Protection Data Protection in Nursing in Europe Data Protection in Nursing Evolution and Protection of the Health Care Record as a European Document A Survey of Legal Issues and Gaps in Legal Coverage in the EC Legal Aspects of Data Protection in Medical Informatics Data Protection Issues in Database Management and Expert Systems La Protection des Donn es M dicales Informatis es en France Benefits and Threats of New Technologies Safety Standards in Medical Software Medical Database Security Security in Medical Networks Data Protection in Networks Medical Network Security and Viruses User Authorization in Distributed Hospital Information Systems The Six Safety First Principles of Health Information Systems A Programme of Implementation Part 1 Safety and Security Management and Staff Issues in Data Protection Practical Aspects of Handling Data Protection and Data Security Administrative Aspects of Data Protection Risk Analysis and Management List of Participants Author Index **Current Bibliographies in Medicine** ,1988 **dHealth 2019 - From eHealth to dHealth** Dieter Hayn,Günter Schreier,2019-06-15 We have all become familiar with the term eHealth used to refer to health informatics and the digital aspects of healthcare but what is dHealth This book presents the proceedings of the 13th annual conference on Health Informatics Meets Digital Health dHealth 2019 held in Vienna Austria on 28 29 May 2019 In keeping with its interdisciplinary mission the conference series provides a platform for researchers practitioners decision makers and vendors to discuss innovative health informatics and eHealth solutions to improve the quality and efficiency of healthcare using digital technologies The subtitle and special focus of dHealth 2019 is from eHealth to dHealth which stresses that healthcare will in future become ever more data driven While eHealth in general concerns healthcare IT solutions and professional healthcare providers dHealth addresses broader fields of application in many areas of life including sensors and sensor informatics networks genomics and bioinformatics data centered solutions machine learning and many more The 32 papers included here provide an insight into the state of the art of different aspects of dHealth including the design and evaluation of user interfaces patient centered solutions electronic health medical patient records machine learning in healthcare and biomedical data analytics and the book offers the reader an interdisciplinary approach to digital health It will be of interest to researchers developers and healthcare professionals alike **Data Security for Health Care** SEISMED Consortium,1996 The efficiency of modern health care relies more and more upon a computerised infrastructure Open distributed information systems have started to bring professionals together from all over the world On the one hand easy processing and communication of images sound and texts will help to visualize and therefore treat illnesses and diseases efficiently on the other hand the very ease of access and use can threaten patient privacy

accountability and health care professional secrecy Developments in community care are responsible for the fact that many aspects of patient care are delivered outside the closed walls of a hospital and hence patient records must also be accessible and updated throughout the community Therefore the introduction of information technology should focus primarily on the improvement of the health of patients or at least not putting patients health at risk This means that the right data has to be available to the right person at the right time availability Information technology deeply affects the confidential relationship between patient and doctor since it increasingly surrounds and mediates it Information systems in health care establishments are increasingly developing towards an integrated system where various users can interact and communicate The process of integration will cross the borders of local health care establishments and it will progressively expand e g into patients homes into a European health care community in order to support the mobility of patients the exchange of medical and administrative data transfer of bills and money
