United States. Congress. House. Committee on Appropriations. Subcommittee on the Departments of Labor, Health and Human Services, Education, and Related Agencies, 2002 *Applying Linguistics in Illness and Healthcare Contexts* Zsófia Demjén, 2020-04-16 All aspects of illness and healthcare are mediated by language experiences of illness death and healthcare provision are talked and written about face to face or online while medical consultations research interviews public health communications and even some diagnostic instruments are all inherently linguistic in nature How we talk to about and for each other in such a sensitive context has consequences for our relationships our sense of self how we understand and reason about our health as well as for the quality care we receive Yet linguistic analysis has been conspicuously absent from the mainstream of medical education health communication training and even the medical or health humanities The chapters in this volume bring together applied linguistic work using discourse analysis corpus methods conversation analysis metaphor analysis cognitive linguistics multiculturalism research interactional sociolinguistics

narrative analysis and im politeness to make sense of a variety of international healthcare contexts and situations These include clinician patient interactions receptionist patient interactions online support forums online counselling public health communication media representations medical accounts diagnostic tools and definitions research interviews with doctors and patients The volume demonstrates how linguistic analysis can not only improve understandings of the lived experience of different illnesses but also has implications for communications training disease prevention treatment and self management the effectiveness of public health messaging access to appropriate care professional mobility and professional terminology among others
