During the 6th-12th c the gradual erosion of the synthetic morphology of Old Indo Aryan resulted ultimately in the remodelling of its syntax in the direction of the New Indo Aryan analytic type. This study concentrates on the emergence and development of the ergative construction in terms of the passive to ergative reanalysis and the co-existence of the ergative construction with the old and new analytic passive constructions. Special attention is paid to the actuation problem seen as the tug of war between conservative and eliminative forces during their development. Other chapters deal with the evolution of grammatical and lexical aspect, causativization, modality, absolute constructions and subordination. This study is based on a wealth of new data gleaned from original poetic works in Apabhramsa by Svayambhadeva, Puspadanta, Haribhadra, Somaprabha et al. It contains sections dealing with descriptive techniques of Medieval Indian grammarians esp Hemacandra. All the Sanskrit, Prakrit and Apabhramsa examples are consistently parsed and translated. The opus is cast in the theoretical framework of Functional Grammar of the Prague and Amsterdam Schools. It should be of particular interest to scholars and students of Indo Aryan and general historical linguistics, especially those interested in the issues of morphosyntactic change and typology in their sociohistorical setting.

The Case System of Eastern Indo-Aryan Languages Bornini Lahiri, 2021-04-29

This book presents a typological overview of the case system of Eastern Indo Aryan (EIA) languages. It utilizes a cognitive framework to analyse and compare the case markers of seven EIA languages: Angika, Asamiya, Bhojpuri, Bangla, Magahi, Maithili and Odia. The book introduces semantic maps which have hitherto not been used for Indian languages to plot the scope of different case markers and facilitate cross-linguistic comparison of these languages. It also offers a detailed questionnaire specially designed for fieldwork and data collection which will be extremely useful to researchers involved in the study of case. A unique look into the linguistic traditions of South Asia, the book will be indispensable to academicians, researchers and students of language studies, linguistics, literature, cognitive science, psychology, language technologies and South Asian studies. It will also be useful for linguists, typologists, grammarians and those interested in the study of Indian languages.
