Thought: A Philosophical History Panayiota Vassilopoulou, Daniel Whistler, 2021-05-03 Of all the topics in the history of philosophy the

history of different forms of thinking and contemplation is one of the most important and yet is also relatively overlooked. What is it to think philosophically? How did different forms of thinking, reflection, contemplation, critique, and analysis emerge in different epochs? This collection offers a rich and diverse philosophical exploration of the history of contemplation from the classical period to the twenty-first century. It covers canonical figures including Plato, Aristotle, Descartes, and Kant, as well as debates in less well-known areas such as classical Indian and Islamic thought and the role of speculation in twentieth-century Russian philosophy. Comprising twenty-two chapters by an international team of contributors, the volume is divided into five parts: Flourishing and Thinking from Homer to Hume; The Thinking of Thinking from Augustine to G. del Vico; Images and Thinking from Plotinus to Unger; Bodies of Thought and Habits of Thinking from Plato to Irigaray; The Efficacy of Thinking from Sextus to Bataille. *Thought: A Philosophical History* is the first comprehensive investigation of the history of philosophical thought and contemplation. As such, it is a landmark publication for anyone researching and teaching the history of philosophy and a valuable resource for those studying the subject in related fields such as literature, religion, sociology, and the history of ideas.

Russian Thought After Communism: The Rediscovery of a Philosophical Heritage James P. Scanlan, 2016-09-16. An examination of Russia's philosophical heritage. It extends from the Slavophiles to the philosophers of the Silver Age from emigre religious thinkers to Losev and Bakhtin and assesses the meaning for Russian culture as a whole. — A.N.

Whitehead's Thought through a New Prism Aljoscha Berve, Helmut Maassen, 2017-01-06. This volume brings together the proceedings of the European Summer School for Process Thought which took place in Mülheim, Germany, in August 2012. It explores Alfred North Whitehead's thinking in different fields of science, connecting his philosophical writings with physics, religion, education, psychology, and aesthetics. The first part of the book is concerned with Whitehead's philosophical methodology, discussing a plethora of subjects including the interdependence between some of Whitehead's works, the role of logic in his style of argument, concepts of time, the role of symbolism, and the relation between specialized terminology and the colloquial in Whitehead's philosophy. The second part explores applications for the concepts of Whitehead's thinking in a broader context. In scientific fields as diverse as physics, theological, and classical Chinese religious thought, concepts of education, and psychological theories of embodiment, Whitehead's basic philosophical concepts have been implemented in various different ways. As such, this book holds an interdisciplinary appeal for Whitehead scholars from different scientific backgrounds.
