Study Abroad And Educational Development:

Study Abroad and Educational Development William D. Carter, 1973 In recent years the role of study abroad in development has been the object of increasing examination as part of the general critique of assistance programs undertaken by international agencies in preparation for the Second Development Decade This review by emphasizing the importance of the human role in development has raised questions as to the more efficient use of educated manpower the under employment of trained people the brain drain and how education and training whether undertaken at home or abroad could make a greater contribution to the total development of a country The aim of this monograph is to review the study abroad problem in order that educational planners and administrators particularly in developing countries might be informed of some of the recent thinking on the subject Certain suggestions are made which may help in the more efficient planning and administration of study abroad in the framework of total educational and development planning Author MW **Study**

Abroad and Educational Development International Institute for Educational Planning, W. D. Carter, 1971 *Impacts of Study Abroad on Higher Education Development* Nobuko Kayashima, Miki Sugimura, Kazuo Kuroda, Yuto Kitamura, 2024-08-10

This open access book is an exceptional contribution to the burgeoning fields of higher education development and higher education internationalization as it empirically examines the impact of the study abroad experiences of faculty members on individual and institutional development The research and its outcomes presented here utilize results from a large scale survey and interviews of faculty at ten leading universities in Malaysia Indonesia Vietnam and Cambodia The analyses show that the study abroad experiences of faculty members impact not only improvements in research quality and development of educational programs but also serve as the foundation for international activities at the university crucially important in today's higher education landscape On the other hand the research reveals the rapid development of higher education at the local and regional levels including the development of graduate programs for faculty training in the home country leading to increasing rates of study abroad within Southeast Asia Through the analyses presented this book offers a new understanding of higher education development and internationalization in Southeast Asia by examining the impact of study abroad on the academic profession higher education institutions and the higher education sector **The First Time Effect** Joshua S.

Student Learning Abroad Michael Vande Berg, R. Michael Paige, Kris Hemming Lou, 2023-07-03 A central purpose of this book is to question the claims commonly made about the educational benefits of study abroad Traditional metrics of enrollment increases and student self report and practices of structural immersion are being questioned as educators voice growing uncertainty about what students are or are not in fact learning abroad This book looks into whether these criticisms are justified and what can be done if they are The contributors to this book offer a counter narrative to common views that learning takes place simply through students studying elsewhere or through their enrolling in programs that take steps structurally to immerse them in the experience abroad Student Learning Abroad reviews the dominant paradigms of study abroad marshals rigorous research findings with emphasis on recent studies that offer convincing evidence about what undergraduates are or are not learning brings to bear the latest knowledge about human learning and development that raises questions about the very foundations of current theory and practice and presents six examples of study abroad courses or programs whose interventions apply this knowledge This book provokes readers to reconsider long held assumptions beliefs and practices about teaching and learning in study abroad and to reexamine the design and delivery of their programs In doing so it provides a new foundation for responding to the question that may faculty and staff are now asking What do I need to know and what do I need to be able to do to help my students learn and develop more effectively abroad Contributors Laura Bathurst Milton Bennett Gabriele Weber Bosley John Engle Lilli Engle Tara Harvey Mitchell Hammer David Kolb Bruce La Brack Kris Hemming Lou Kate McCleary Catherine Menyhart R Michael Paige Angela Passarelli Adriana Medina Lopez Portillo Meghan Quinn Jennifer Meta Robinson Riikka Salonen Victor Savicki Douglas Stuart Michael Vande Berg James Zull While the authors who have contributed to Student Learning Abroad are all known for their work in advancing the field of education abroad a number have recently been honored by leading international education associations Bruce La Brack received NAFSA's 2012 Teaching Learning and Scholarship Award for Innovative Research and Scholarship Michael Paige 2007 and Michael Vande Berg 2012 are recipients of the Forum on Education Abroad's Peter A Wollitzer Award

Education Abroad and the Undergraduate Experience Elizabeth Brewer, Anthony C. Ogden, 2023-07-03 Co published with This volume focuses on two questions First how can education abroad be embedded into undergraduate education so that students experience it as an integral component of their education and something they help shape rather than as time away from their education and as a commodity to be consumed Second how can colleges and universities maximize the educational value of education abroad by forging stronger connections between it and other undergraduate experiences The volume argues that learning abroad be positioned within the work of the larger institution and students overall education Organized within three sections this volume makes the case

that learning abroad must be positioned within the work of the larger institution and students overall education. In doing so it questions many current assumptions and stimulates thinking about the power of an integrative approach to education abroad to lead to lasting educative value. An integrative approach requires that students be afforded multiple opportunities and ongoing support to draw connections with their learning abroad with other dimensions of their undergraduate education. Chapters cover topics such as the additive value of integrating multiple HIPs with education abroad to span disciplinary boundaries and promote an array of soft or operational skills; the importance of maintaining the disruptive quality of the encounter with the foreign to enrich study at home; issues of commodification and reciprocity; increasing access to study abroad to community college particularly adult populations; facilitating students' social and intellectual development; identity formation and reflective practice; rethinking orientation programming to emphasize the continuity of learning pre during and post education abroad; asking fundamental questions about the purpose of education abroad to rethink assessment and its purposes; the faculty role in the internationalization of the curriculum and developing more intentional relationships with in field partners and international educational organizations to more effectively connect learning abroad with other dimensions of undergraduate education. For everyone involved in international education whether SIOs, faculty, department chairs or deans, the critical questions and new perspectives offered here will inform and shape the growing movement to integrate education abroad with the overall undergraduate experience.

Study Abroad and Educational Development International Institute for Educational Planning, William D. Carter, Unesco. International Institute for Educational Planning, 1973

Education Abroad Erin A. Mikulec, Samantha Potempa, Kara Pike Inman, 2021-01-01 Education abroad is an essential part of the university student experience. Initiatives such as IIE's Generation Study Abroad encourage more U.S. undergraduate and graduate students to study abroad. According to the Open Doors 2019 Report by the Institute for International Education, 341,751 students participated in post secondary education abroad programs during the 2017-2018 academic year. This figure represents an increase of 2.7% of U.S. students studying abroad from the previous year. Research shows that education abroad provides students with opportunities not only to see the world but also to develop intercultural competence which is increasingly crucial in the 21st century workplace. There are also numerous studies that show gains in autonomy, confidence and tolerance for ambiguity in students who complete some type of study abroad experience. In sum, the education abroad experience in itself represents a powerful learning environment that continues to support personal and professional development long after returning home. Nonetheless, these learning environments must be cultivated along with faculty who develop and lead programs as well as university partners and providers. Furthermore, education abroad programming and assessment is complex and must take into consideration many factors including academic goals, purposeful curricular development and a balance between academics and leisure activities on site. This book explores the many aspects of education abroad as a learning environment such as student learning outcomes, faculty development and program

assessment and evaluation In addition several chapters present education abroad experiences as a model for community engagement and activism The authors represent a diverse range of institutions and perspectives and discuss programs around the globe The book represents the voices of faculty that lead education abroad programs students who participate in them and also those of international students on a U S campus reflecting on their personal experiences abroad Furthermore this book contributes to the discussion of best practices to assist faculty and program directors in creating robust education abroad programs that meet the needs of their students and institutions *Academic and Educational Development* Ranald Macdonald, 2003-12-16 Part of the well known Staff and Educational Development Series this practice oriented book brings together leading research and evaluation approaches and supporting case studies from leading educational researchers and innovative teachers With much emphasis on change innovation and developing best practice in higher education it is essential that those involved in actually developing researching or implementing approaches to teaching learning or management are informed by the experiences of others The emphasis of this book is on changing practice in HE how developments come about what research underpins desirable development and the impact of development of student learning staff expertise and institutional practice and policy Specifically the book is developed in two themed parts Part A Supporting change within subjects and departments Part B Supporting change within institutions and the wider environment
