

Home Study: ETHICS

Ethics are the **set of moral principles that guide a person's behavior**. These morals are shaped by social norms, cultural practices, and religious influences. Ethics reflect beliefs about what is right, what is wrong, what is just, what is unjust, what is good, and what is bad in terms of human behavior.

While **ethical beliefs are held by individuals**, they can also be reflected in the values, practices, and policies that shape the choices made by decision makers on behalf of **their organizations**. The phrases business ethics and corporate ethics are often used to describe the application of ethical values to business activities. Ethics applies to all aspects of conduct and is relevant to the actions of individuals, groups, and organizations.

In addition to **individual ethics** and **corporate ethics** there are professional ethics. Professionals such as managers, lawyers, and accountants are individuals who exercise specialized knowledge and skills when providing services to customers or to the public. By virtue of their profession, they have obligations to those they serve.
