Languages in Japan Chika Takahashi, 2022-11-22 This book provides rare insights into motivation among extremely successful learners of English and languages other than English LOTEs through the analysis of a longitudinal study and the examination of the factors involved in becoming multilingual in a non multilingual environment Based on sixteen interview sessions conducted over the course of nine years while the learners progressed from high school to the world of work this book offers the story of how two learners persist in English LOTE learning The study illuminates the long term processes through which the interviewees develop ideal English LOTE selves in an environment where multilingualism is not emphasized and where both English and LOTEs can still be described as foreign languages Educators and researchers will learn from this study which stretches our understanding of motivation beyond the recent theorizing of L2 motivation and contributes to the limited research in long term motivational trajectories and LOTE learning motivation which is particularly scarce in non European contexts The book will be of interest not only to readers in Japan but also to those in other contexts as it offers an example of successful learners who go beyond the pragmatic and instrumentalist view of language learning to

hold a more holistic view thus revealing the factors which can sustain multiple language learning even in foreign language contexts *Personal experiences, observations, and studies in Japan, 1870-1874* William Elliot Griffis, 1898 **Studying**

Japanese Information in Science, Technology and Commerce D. Mönch, 1990 **Handbook of Higher Education in Japan** Paul Snowden, 2025-10-01 Just as higher education HE in Europe had its beginnings in religious training for the priesthood HE in feudal Japan too provided instruction for a religious life But while the evolution to secular instruction was gradual in Europe in Japan it came with a big bang the opening of the country and consequent Westernization and all that that involved in the mid 19th century This first volume in the new Japan Documents Handbook series tells the story in 25

chapters of how Japan's HE system has become what it is now ending with a very tentative glimpse into the rest of the 21st century. A variety of themes are covered by scholars: chapters that concentrate on governance look at the distinction between national public and private institutions; others consider important topics such as internationalization, student recruitment, and faculty mobility. More innovative topics include *Women of Color Leading in Japanese Higher Education*. All provide copious references to other authorities but rather than just toe the conventional line they include opinions and proposals that may be contentious or even revolutionary. The editor provides an overview of the subject and its treatment in an Introduction.

Theorizing Shadow Education and Academic Success in East Asia Young Chun Kim, Jung-Hoon Jung, 2021-07-12. This volume tackles perceived myths surrounding the academic excellence of East Asian students and moves beyond Western understanding to offer in-depth analysis of the crucial role that shadow education plays in students' academic success. Featuring a broad range of contributions from countries including Japan, China, Taiwan, and Singapore, chapters draw on rich qualitative research to place in the foreground the lived experiences of students, teachers, and parents in East Asian countries. In doing so, the text provides indigenous insights into the uses, values, and meanings of shadow education and highlights unknown cultural and regional aspects as well as related phenomena including transboundary learning, culture, nomadic learning, individualized learning, and the post-schooling era. Ultimately challenging the previously dominating Western perspective on shadow education, the volume offers innovative theorization to highlight shadow education as a phenomenon which cannot be overlooked in broader discussion of East Asian educational performance systems and policy. Offering pioneering insights into the growing phenomenon of shadow education, this text will benefit researchers, academics, and educators with an interest in international and comparative education, curriculum studies, and East Asian educational practices and policy. Those interested in the sociology of education and educational policy will also benefit from this book.
