Michael B. Horn, Bob Moesta, 2019-09-11 Cut through the noise and make better college and career choices This book is about addressing the college choosing problem The rankings metrics analytics college visits and advice that we use today to help us make these decisions are out of step with the progress individual students are trying to make They don't give students and families the information and context they need to make such a high stakes decision about whether and where to get an education Choosing College strips away the noise to help you understand why you're going to school What's driving you What are you trying to accomplish Once you know why the book will help you make better choices The research in this book illustrates that choosing a school is complicated By constructing more than 200 mini documentaries of how students chose different postsecondary educational experiences the authors explore the motivations for how and why people make the decisions that they do at a much deeper causal level By the end you'll know why you're going and what you're really chasing The book Identifies the five different Jobs for which students hire postsecondary education Allows you to see your true options for what's next Offers guidance for how to successfully choose your pathway Illuminates how colleges and entrepreneurs can build better experiences for each Job The authors help readers understand not what job students want out of college but what Job students are hiring college to do for them

Gallagher, 2019-09-24 How can universities shape creative adaptive integrated learners ready to confront the world This book's clear-eyed optimism is a challenge to everyone in higher education American higher education is being torn apart Institutions curricula courses and faculty roles are being unbundled broken into constituent parts in the name of efficiency and cost savings As a result the college learning

experience is fragmented and incoherent leaving graduates less and less equipped to confront the dire social problems that cause those divisions in the first place In *College Made Whole* Chris W Gallagher lays bare the dangers of the dis integration of the college experience and shows how we can put higher education back together again The successful colleges and universities of the future Gallagher argues will be integrated coherently and cohesively designed to help students achieve a lifelong learning experience that is more than the sum of its parts Pushing back against pernicious dichotomies that frame much discussion of US higher education Gallagher critiques many of the hottest educational trends including the overhyping of technological solutions rampant adjunctification the promotion of nondegree credentials as a suitable replacement for college degrees and the increasingly narrow focus on the vocational aims of a college education Investigating the purposes of higher education historically and today he suggests audacious proposals to enhance learning including reorganizing institutions reordering institutional priorities redesigning curricula and courses and rethinking edtech and learning technologies Lucidly written and packed with practical recommendations and real student stories *College Made Whole* will challenge higher education professionals and policy makers as well as anyone with a stake in the future of US higher education which is to say all of us who inhabit this fragile planet
