*Labor Relations in Education* Todd A. DeMitchell, 2010-01-16 This book explores unions and collective bargaining in the public schools of America Changes that may move labor relations into professional relations and away from the industrial labor union model and diminish the schism that exists between educators are discussed

**Teachers and Their Unions** Todd A. DeMitchell, 2020-01-15 Teachers and Their Unions Labor Relations in Uncertain Times explores the decade of uncertainty in public education following the Great Recession by first laying a foundation that describes the development of teachers and public education and the rise of teacher unions The selection of the industrial labor model at the outset of public sector collective bargaining set the table for challenges to its fit with education The theme of teacher as member of a union and teacher as a professional is explored within the context of a collective bargaining environment The section Law and Politics in Uncertain Times Retrenchment and Assault explores the decade of uncertainty It reviews the industrial union model and within the twin challenges of the conundrum of teacher as union member and professional in the struggles of the decade Tenure boondoggle or necessary protection VAM rank and yank right to work agency fees and teacher strikes are explored within the themes of the industrial union model and the tension of union member and professional The book concludes with thoughts for the future and responds to the question of whether teacher unions are still pertinent

A New Deal for Teachers Curtis Johnson, 2021-03-05 Teachers fully in charge of what matters for student and school success is now a movement growing steadily in nearly half the states of the U S According to a national survey most teachers in America are unaware that this is a professional option And because most thinking is about real school it is apparently not safe for even scholars to talk about teachers being in charge Nearly every book diagnoses the problem then defaults to a conventional remedy like chasing good principals This book is aimed at raising the teacher powered movement s visibility making it safe to talk about teachers in charge of schools showing how this arrangement erases the talent drain now plaguing the schools and offering evidence that students do better in these schools than they do in the conventional system The book outlines how the movement could get bigger faster And the massive institutional resistance to change that slows its progress And unlike most books the author sees teachers unions as part of the solution

Education Reform and the Quest for Excellence Lok Sang Ho, Paul Morris, Yue-ping Chung, 2005-11-01 This book investigates and analyses critical issues in education reform and discusses possible pitfalls in the current global drive to promote excellence Instead of documenting the successes and frustrations encountered by education reformers in specific

jurisdictions this book aims to offer directions for education reformers and sets out to be prescriptive rather than descriptive. While the cases covered here are focused on Hong Kong they are no less useful in throwing light upon the direction of education reform all over the world. The first section of the volume, Conceptual Framework, provides the theoretical underpinnings for the design and implementation of education reform. The next two sections, Reform of Tertiary Education and Experiments, Dilemmas and Risks in Secondary Schools, look at reform at the tertiary and secondary levels in greater detail. The final section, Ideals vs Reality: the Interplay of Diverse Interests and Diverse Perceptions, looks at the conflicting goals and perceptions of different stakeholders with a concluding chapter that summarizes the main lessons to be learnt. This book will be of interest to scholars, educators, parents, policymakers, politicians and all who are concerned about our younger generation and their future. The editors, Lok Sang Ho, Paul Morris and Yue ping Chung, are to be congratulated on producing a volume which is both hard hitting and insightful about education reforms in Hong Kong. The range of experiences of the contributing authors contribute to a most interesting mix of perspectives about education reform. The focus is squarely on Hong Kong in terms of general policy and reform issues followed by more specific chapters dealing with issues of graduate teachers, English as a medium of instruction and the role of the media. However, the issues raised are very applicable to many countries. This book is a valuable contribution to the literature on education reform. Professor Colin J Marsh, Curtin University, Perth, Western Australia.

**Resources in Education**, 1999

*Who Governs Our Schools?* David T. Conley, 2003-01-01. This book provides valuable insights into a dynamic structural change that is being experienced but not completely understood by educators and policymakers alike: the transfer of power from the local to the state and national levels. What will become of our public schools in this new era of leadership? The author traces the origins of this process, examines the implications and considers where these changes might lead. This extremely timely volume explores the direction of education policy and the ways in which both policymakers and educators can adapt and provide leadership in this new landscape. Offers a concise, accessible summary of a multitude of specific programs and policies helping us to think more systematically about the shifts in power relationships among education governance levels. Presents an outline of actions that can be taken at the local, state and national levels to help facilitate better working relationships and to help improve schools. Examines the new federal role and recent federal legislation including the No Child Left Behind Act of 2001.

*Industrial Relations in Education* Bob Carter, Howard Stevenson, Rowena Passy, 2009-12-30. All phases of education from pre-school to post-compulsory in virtually all parts of the world have experienced unprecedented reform and restructuring in recent years. Restructuring has largely been driven by a global agenda that has promoted the development of human capital as the key to economic competitiveness in the global market. This book adopts an inter-disciplinary approach drawing not only on education research but also from the fields of industrial sociology, management studies and labour process theory to locate the reform agenda within a wider picture relating to teachers, their professional identities and their experience of work. In doing so, the book draws on critical

perspectives that seek to challenge orthodox policy discourses relating to remodelling.
