Taking Charge Through Home Schooling Personal And Political Empowerment:

Taking Charge Through Home Schooling M. Larry Kaseman, Susan D. Kaseman, 1990 **The California Homeschool Guide** California Home School Network, 2002 The California Homeschool Guide is the answer to what prospective and experienced California homeschoolers have been needing for years a comprehensive handbook that includes how to homeschool legal options for California parents inspiring advice from veteran homeschoolers and extensive resources The wisdom of many experienced homeschoolers was brought together into this guide to provide a resource that parents will be able to use for years as they go from new homeschooler to veteran **The Complete Home Learning Sourcebook** Rebecca Rupp, 1998 Lists all the resources needed to create a balanced curriculum for homeschooling from preschool to high school level **Home Schooling** Frederick M. Lawrence, 2007 From left to right on the political spectrum there is at least one note of agreement the nation's school system has not delivered universal quality education Accordingly debate has raged over how to rectify this situation Should the government increase funding encourage privatisation some of both Another option though has emerged and is seemingly gaining popularity home schooling Citing both substandard education and displeasure with school environments and curricula many parents have decided to teach their own children Supporters say it is well within their rights to raise their children as they see fit and that at home learning is superior to the public system Detractors claim that home schooled children are deprived of social interaction and the broad based education provided by the system Neither side wants to cede ground making the issue of home schooling an integral part of a wider national debate on education In this book the specific topic of home schooling is presented from all relevant sides to give a complete picture of the present status of the issue and its potential for future resolution Following this overview is a thorough and carefully selected bibliography of literature about home schooling from all viewpoints Easy access to this important resource is then provided via author title and subject indexes **Lives in Context** Ardra L. Cole, J. Gary Knowles, 2001 The reflexive turn in qualitative research has transformed the process of doing life history research No longer are research subjects examined through the lens of the all knowing but supposedly invisible researcher As Ardra Cole and Gary Knowles point out in this fresh introduction to conducting life history research the process is now one of mutuality empathy sensitivity and caring The authors carry the novice researcher through the steps of conducting life history research from conceptualizing the project to the various means of presenting results with an eye toward understanding the complex relationship between participant and researcher and how that shapes the project In addition to examples from their own research Cole and Knowles bring in the work of a dozen novice researchers who explain the challenges they faced in developing their own life history projects in a wide variety of settings Well written interesting and pedagogically sound *Lives in Context* is the ideal text for teaching life history research to students and an important reference for the bookshelf of all qualitative researchers **Homeschooling: The Early Years** Linda Dobson, 1999-08-11 Discover the Rewards of Homeschooling Your Young Child Young children are

full of curiosity imagination and a sense of wonder They re willing to try new things and possess a natural joy of discovery Yet in a traditional school these natural behavior traits are too often squelched That s why more and more parents just like you are choosing to teach their children at home during these critical years the years that lay the foundation for developing learning skills that last a lifetime Inside respected homeschooling author Linda Dobson shows you how homeschooling can work for you and your young child You ll discover how to Tailor homeschooling to fit your family s unique needs Know when your child is ready to learn to read Teach your child arithmetic without fear even if you re math challenged Give your child unlimited learning on a limited budget And much more Brings dazzling clarity to the otherwise nerve wracking confusion of early learning and the adventure of becoming fully human Highly recommended John Taylor Gatto former New York State Teacher of the Year and author of Dumbing Us Down Provides a much needed introduction to living and learning with young children Open the book to any page and you ll find inspiring anecdotes and approaches to learning that leave the reader thinking That just makes so much sense Highly recommended for anyone who lives works or plays with young children Helen Hegener managing editor of Home Education Magazine An information packed delight I only wish it had been around when our three boys were three to eight years old Rebecca Rupp author of The Complete Home Learning Sourcebook This book brings together the experience and wisdom of a great variety of homeschooling families tied together with warm encouragement and wonderful simplification of processes that can seem so mysterious and daunting to the beginner A very solid resource Lillian Jones homeschooling activist writer and reviewer

The Homeschooling Handbook Mary Griffith, 1997 As many as two million parents now educate their children at home and many more are considering the idea This non ideological book examines the pros and cons discusses how to handle regulations and shows how to design and implement a productive learning atmosphere at home for students of all ages
