Telematics in the Transport Environment Jerzy Mikulski,2012-09-25 This book constitutes the proceedings of the 12th International Conference on Transport Systems Telematics TST 2012 held in Katowice Ustron Poland in October 2012 The 48 papers included in this volume were carefully reviewed and selected for inclusion in this book Transport telematics are the systems using the information and communication technologies in the area of infrastructure and of means of transport and its participants An intelligent transport covers systems that allow through the data transmission and analysis to influence the behaviour of road users and the action of technical elements in means of transport or along the traffic route Intelligent transport systems in accordance with the European Directive are used for the transport management informatisation The research shows that the use of telematics can significantly increase the efficiency of the transport system the road safety and the environmental protection This book provides an overview of solutions being developed in the field of intelligent transportation systems and includes theoretical and case studies in the countries of conference participants

Ventilation and Airflow in Buildings Claude-Alain Roulet,2012-05-16 Energy efficiency in buildings requires among other things that ventilation be appropriately dimensioned too much ventilation wastes energy and insufficient ventilation leads to poor indoor air quality and low comfort Studies have shown that ventilation systems seldom function according to their commissioned design They have also shown that airflow measurement results are essential in improving a ventilation system This key handbook explains why ventilation in buildings should be measured and describes how to measure it giving applied examples for each measurement method The book will help building physicists and ventilation engineers to properly commission ventilation systems and appropriately diagnose ventilation problems throughout the life of a building Drawing on over 20 years of experience and the results of recent international research projects this is the definitive guide to diagnosing airflow patterns within buildings *The Homeowner's Energy Handbook* Paul Scheckel,2013-04-29 Are you looking for

creative ways to lower your energy costs generate more of your own power or become less reliant on the grid Paul Scheckel offers practical advice for taking matters into your own hands Explaining the fundamentals of solar wind water and biofuel energy production Scheckel shows you how to build and maintain a wide variety of energy saving and energy producing equipment ranging from thermosiphon solar hot water collectors to bicycle powered generators Use less energy save money and help preserve the environment
