Taking A Stand Against Environmental Pollution:

Taking a Stand Against Environmental Pollution David E. Newton, 1990 Examines current environmental issues and suggests ways to become involved in solving problems with pollution Environmental Rights Stephen J. Turner, Dinah L. Shelton, Jona Razzaque, Owen McIntyre, James R. May, 2019-05-23 Environmental rights also known as the human rights or constitutional rights that are used for the protection of the environment have proliferated over the last forty five years However the precise levels of protection that they represent has since been a major question associated with this phenomenon Environmental Rights The Development of Standards systematically investigates this question by analyzing the emerging standards of environmental protection that are associated with such rights and the way that those associations are becoming formalized It covers all of the relevant human rights treaties to illustrate how environmental rights standards are emerging in this dynamic area Bringing together an elite group of scholars this book discusses significant new insights into the way that environmental rights are developing the standards of protection that they confer and the way that standards in the field of environmental rights can potentially be further developed in the future *The Affluent Consumer* Ronald D. Michman, Edward M. Mazze, 2006-09-30 By any measure the affluent sector is growing exponentially and is far more diverse in terms of ethnicity education location and professional background than any time in the past This market represents lucrative opportunities for companies that understand how these customers think act and make purchasing decisions Applying primary research including demographic and economic data and expertise developed from decades of studying teaching and consulting in marketing and consumer behavior Ronald Michman and Edward Mazze present a comprehensive approach to analyzing the affluent consumer and creating promoting and selling innovative products and services to them Illustrating their principles through dozens of examples including Armani Mercedes Benz Brooks Brothers Neiman Marcus Merrill Lynch Tiffany and even discounters such as Target and Wal Mart the authors deconstruct how a complex market segment works Dispelling popular myths and misconceptions about the composition and behavior of this segment they provide not only a practical guide for marketers and students of marketing but a fascinating glimpse into a culture driven by materialism status and aspirations to luxury By any measure the affluent sector is growing exponentially and is far more diverse in terms of ethnicity education location and professional background than at any time in the past In 2004 there were 8.2 million households in the United States with net worth over 1 million excluding primary residence Meanwhile between 1995 and 2001 the number of families filing tax returns for income exceeding 200 000 doubled This market represents lucrative opportunities for companies that understand how these consumers think act and make purchasing decisions

Institutions and the Environment Arild Vatn, 2007-01-01 Vatn has prepared a vast feast for his readers Hopefully this book will become one of the core textbooks both in institutional economics and in resource economics As a political scientist I can recommend it to social scientists more generally I must confess I enjoyed it all Elinor Ostrom 2009 Nobel Laureate Land

Economics Institutions and the Environment indeed serves as a first rate starting point for students and researchers regardless of whether they are mainly interested in institutions in general or environmental governance and ecological economics in particular Charlotta S derberg Environmental Politics This timely book is about institutions how they develop how they function and how they solve problems This book exemplifies the fine institutionalist tradition of using knowledge to solve pressing problems in fact institutionalists will find little here to criticize The scope of this book is wide policy makers government officials institutionalists environmentalists and the general public will all benefit from reading this book Keep this book handy you ll want to make frequent references as the global warming policy debate unfolds Jack Reardon Journal of Economic Issues Vatn s book addresses the urgent question of environmental policy and shows that an understanding of the role of institutions is vital in this area It incorporates insights on institutions from both mainstream and heterodox traditions of thought Magisterial and comprehensive it is both a textbook and an inspiring pioneering monograph Geoffrey M Hodgson University of Hertfordshire UK This is an excellent book which can be read at different levels I very much enjoyed reading this book and would recommend it to anyone interested in these issues I feel it is likely to become one of the core text books on the topic Neil Powe Newcastle University UK We have here an encompassing work of remarkable clarity and coherence demonstrating the enduring pertinence of classical institutional economics to the vexing issues of our time While most of the illustrative examples come from the realm of environmental problems the reach of this fine book goes far beyond this particular issue and informs how we ought to think about all aspects of public policy Daniel W Bromley University of Wisconsin Madison US This is a superb book on institutional economics and environmental policy Vatn has written the definitive exposition of the theory and policy approaches of modern institutional economics It not only builds on the work of the best institutional economists from Veblen to Bromley and Hodgson it also incorporates the extremely relevant and exciting research now being done in contemporary mainstream economics With the demise of Walrasian economics and the current drive for the unification of the behavioral sciences the time is ripe for institutional economics to once again become a dominant school of economic thought Vatn s book shows the way John Gowdy Rensselaer Polytechnic Institute US This important text develops an institutional response to the core issues raised in public policy making and develops a distinct understanding of the role of institutions not least in the study of environmental problems It questions how are conflicting interests shaped and taken into account in policy making How should they be accounted for What motivates the behaviour of firms and individuals and how is it possible to change these motivations to produce the favoured common outcomes The author addresses these questions by integrating elements from classical institutional economics neoclassical economics sociology and ecological economics He argues that public policy in general and environmental policy in particular are best examined from an institutional perspective In this way the author presents a distinct and consistent alternative to standard neoclassical economics for students and scholars who Economic Dislocation Resulting from Environmental Controls
