Understanding Creative Users of ICTs David Kurt Herold,Harmeet Sawhney,Leopoldina Fortunati,2013-09-13 The disjuncture between the design intent of the developers of ICTs and the needs of the users has often led to surprising use of new technologies as users have refused to become mere agents of the designers Individual users have adopted their own uses of ICTs based on the complex webs of relations and meanings in which they function as social actors Instead of adjusting these webs to new ICTs they have fit the ICTs into their pre existing social webs often resulting in imaginative and creative uses of new technologies not envisaged by the original designers The contributions in this volume provide studies of such integrations of ICTs into the lives of human users and demonstrate that such uses should not be regarded as faulty or mistaken merely because they fail to meet the expectations of the original designers of the ICTs Instead human users should be given precedence over ICTs and the creative uses of universal technologies by individual users should be emphasised and studied so as to move towards a better understanding and appreciation of the integration of ICTs into human lives This book was originally published as special issue of The Information Society

From Snapshots to Social Media - The Changing Picture of Domestic Photography Risto Sarvas, David M.

Frohlich, 2011-02-09 From Snapshots to Social Media describes the history and future of domestic photography as mediated by technological change Domestic photography refers to the culture of ordinary people capturing sharing and using photographs and is in a particular state of flux today as photos go digital The book argues that this digital era is the third major chapter in the 170 year history of the area following the portrait and Kodak eras of the past History shows that despite huge changes in photographic technology and the way it has been sold people continue to use photographs to improve memory support communication and reinforce identity The future will involve a shift in the balance of these core activities and a replacement of the family album with various multimedia archives for individuals families and communities This raises a number of issues that should be taken into account when designing new technologies and business services in this area including the ownership and privacy of content multimedia standards home ICT infrastructure and younger and older users of images The book is a must for designers and engineers of imaging technology and social media who want a better understanding of the history of domestic photography in order to shape its future It will also be of value to students and
