Food Security, Agricultural Policies and Economic Growth Niek Koning, 2017-04-21 Using a political economic approach supplemented with insights from human ecology this volume analyzes the long term dynamics of food security and economic growth The book begins by discussing the nature of preindustrial food crises and the changes that have occurred since the 19th century with the ascent of technical science and the fossil fuel revolution It explains how these changes improved living standards but that the realization of this improvement was usually dependent on government support for smallholder modernization The author sets out how the evolution of food security in different regions has been influenced by farm policy choices and how these choices were shaped by local societal characteristics international relations and changing configurations in metropolitan countries Separate chapters are devoted to the interaction of this evolution with debates on food security and economic growth and with international economic policies The final chapters highlight the new challenges for global food security that will arise as traditional sources of biomass production and the more easily extractable reserves of fossil biomass become depleted or can no longer be used Overall the book emphasizes the inadequacy of current explanations with regard to these challenges It explores what is needed to ensure a sustainable future and calls for a rethinking of these issues a necessary reflection in today s unstable global political situation

Bygone Utopias and Farm Protest in the Rural Midwest Daniel Jaster, 2021-04-09 This book explores those who long for bygone utopias times before rapid culturally destructive social change stripped individuals of their perceived agency The case of the wave of foreclosure protests that swept through the rural American Midwest during the 1930s illustrates these themes These actions embodied a utopian understanding of agrarian society that had largely disappeared by the late 19th century hundreds to thousands of people fixed public auctions of foreclosed farms returning owners property and giving them a second chance to save their farm Comparisons to later movements including the National Farmers Organization and the protests surrounding the 1980s Farm Crisis highlight the importance of culturally catastrophic social change occurring at a breakneck pace in fomenting these types of bygone utopian actions These activists and movements should cause scholars to re think what it means to be conservative and how we view conservatism helping us better understand why we re seeing a contemporary resurgence in nationalist and reactionary movements across the globe
