The Long Darkness Psychological And Moral Perspectives On Nuclear Winter By:

The Long Darkness Lester Grinspoon Grinspoon, Genocide, War, and Human Survival Charles B. Strozier, Michael Flynn, 1996-05-07 From the tragic workings of the Holocaust and Hiroshima to contemporary examples of genocide in Bosnia and Rwanda this provocative collection of original essays examines the enduring impact of cataclysmic events on the modern human psyche Inspired by the career of Robert Jay Lifton the distinguished contributors use a wide range of disciplinary and methodological approaches to probe society culture and politics in the nuclear age and they explore the therapeutic value of artistic expression to witnesses and survivors of mass violence The essays convey a message of hope by displaying the remarkable diversity of human responses to extreme adversity and by concluding that intellectuals and professionals have an abiding obligation to act responsibly in a world of violence and to provide healing images of transformation Contributors

Energy Abstracts for Policy Analysis ,1987 **A Nuclear Winter's Tale** Lawrence Badash, 2009-07-10 The rise and fall of the concept of nuclear winter played out in research activity public relations and Reagan era politics The nuclear winter phenomenon burst upon the public s consciousness in 1983 Added to the horror of a nuclear war s immediate effects was the fear that the smoke from fires ignited by the explosions would block the sun creating an extended winter that might kill more people worldwide than the initial nuclear strikes In *A Nuclear Winter s Tale* Lawrence Badash maps the rise and fall of the science of nuclear winter examining research activity the popularization of the concept and the Reagan era politics that combined to influence policy and public opinion Badash traces the several sciences including studies of volcanic eruptions ozone depletion and dinosaur extinction that merged to allow computer modeling of nuclear winter and its development as a scientific specialty He places this in the political context of the Reagan years discussing congressional interest media attention the administration s plans for a research program and the Defense Department s claims that the arms buildup underway would prevent nuclear war and thus nuclear winter *A Nuclear Winter s Tale* tells an important story but also provides a useful illustration of the complex relationship between science and society It examines the behavior of scientists in the public arena and in the scientific community and raises questions about the problems faced by scientific Cassandras the implications when scientists go public with worst case scenarios and the timing of government reaction to startling scientific findings *Twilight of the Bombs* Richard Rhodes, 2011-09-06 The final volume in Richard Rhodes s prizewinning history of nuclear weapons offers the first comprehensive narrative of the challenges faced in the post Cold War age The past twenty years have transformed our relationship with nuclear weapons drastically With extraordinary depth of knowledge and understanding Richard Rhodes makes clear how the five original nuclear powers Russia Great Britain France China and especially the United States have struggled with new realities He reveals the real reasons George W Bush chose to fight a second war in Iraq assesses the emerging threat of nuclear terrorism and offers advice on how our complicated relationships with North Korea and South Asia should evolve Finally he imagines what a post nuclear world might look like as

only he can *Nuclear Threats, Nuclear Fear and the Cold War of the 1980s* Eckart Conze, Martin Klimke, Jeremy Varon, 2017 The book brings together cutting edge scholarship from the United States and Europe to address political and cultural responses to the arms race of the 1980s **Imaginal Memory and the Place of Hiroshima** Michael Perlman, 1988-07-08 Hiroshima claims a crucial yet neglected place in the psychic terrain of our individual and collective memories Drawing on recent work in depth psychology and Jungian thought this study explores the ancient art of remembering by envisioning places and images that are impressed upon the memory Enthusiastically used by ancient medieval and Renaissance explorers of soul and spirit the art of memory became a profound expression of striving for cultural reform and an end to religious cruelty Imaginal Memory and the Place of Hiroshima shows that images arising from the place of Hiroshima reveal with stark exactitude the psychic situation of our world Specific images are explored that embody unsuspected psychological values beyond their role as reminders of the concrete horror of nuclear war The process of remembering these images deepens into a commemoration of the fundamental powers at work in the psyche powers that are critical to the development of a sustained cultural commitment to peace and to the deepening and revitalizing of contemporary psychological life *World War III: Nuclear War* Gary L. Wilson, 2017-02-20 Author Gary L Wilson has studied the Bible extensively for many years with the goal of saving the American people and the people in Europe who will be caught in the famine of the Antichrist In World War III Nuclear War he provides Biblical evidence of how to prevent nine possible nuclear wars between the Pentagon and the Antichrist who will use the nuclear arsenals of Russia the former Soviet nations and Europe to threaten the world during World War III Wilson offers an extensive discussion of the political social and spiritual implications of the coming warfare and what changes have already happened in Europe to make it possible for the Antichrist to start World War III in AD 2030 He tells the public how to prepare for the coming end times so they can be strong in their faith and look forward to peace with God He also explains how to decipher the prophetic words and symbols found in the book of Revelation Filled with ample scriptural evidence World War III Nuclear War outlines the instructions of Christ and the Lord God to avoid the impending nuclear wars Wilson predicts a nuclear attack on Rome in 2030 as told in Revelation 18 4 and 18 19 He also predicts a major nuclear war and nuclear winter as told in Revelation 8 12 *Uprising at Bowling Green* Norbert Wiley, Joseph B Perry Jr, Arthur G. Neal, 2015-11-17 Often overlooked the student demonstration at Bowling Green State University was the first and most successful 1960s campus protest and a key point in the transition from 1950s social mores to 1960s activism What began as a protest against outdated rules about dating and student behaviour quickly turned toward political objectives about civil liberties and ousted the university president The authors two of whom were present on campus during the demonstration tell the story of how what began as dissent against old schoolmarm rules quickly turned into a fully fledged 1960s crusade with new issues and tactics Feminist activists played a leading role and the uprising succeeded in advancing the civil liberties of women Drawing on the sociological ideas of Weber Durkheim and Marx

this book depicts how young activists broke the 1950s mold little aware that many of their ideals would be echoed in many important 1960s protests It is a vivid portrait of how the 1950s became the 1960s in America **Sociological Perspectives on Modernity** Arthur G. Neal, 2007 Original Scholarly Monograph
