LOVE EVOLVES **Sheherazade Through the Looking Glass**
Eva Sallis, 2013-10-18. The Thousand and One Nights was reborn into an alien environment in 1704, its signs being received in a radically different way from their original meanings. Works of literature change as people and cultures who read them change. This study explores the Nights with reference to this view of literature. *Alice's Adventures in Wonderland & Alice Through the Looking-Glass* Lewis Carroll, 2023-11-10. Lewis Carroll's iconic works, Alice's Adventures in Wonderland and its sequel Alice Through the Looking Glass, offer an intricate exploration of the absurdities of logic and the fluidity of reality. Through whimsical prose and delightful wordplay, Carroll constructs a fantastical landscape that challenges both the conventions of Victorian literature and the very nature of childhood innocence. The narrative is characterized by its dreamlike qualities, linguistic inventions, and illogical encounters reflecting the complexities of growing up and the quest for identity within a bewildering world. Born Charles Lutwidge Dodgson, Lewis Carroll was an Oxford mathematician, logician, and photographer. His dual identity as a scholar and a whimsical storyteller uniquely positioned him to craft narratives that melded intellectual rigor with playful imagination. Inspired by his relationships with children, particularly with Alice Liddell, Carroll infused his works with themes of curiosity and exploration, mirroring the tensions between childhood wonder and societal expectations. This enduring classic is essential for any reader, both young and old, as it invites them to venture into a world of fantasy where curiosity reigns supreme. Carroll's masterful narrative offers layers of meaning that resonate with contemporary themes, making it a recommended read for those who seek both enjoyment and intellectual engagement.

The looking machine David MacDougall, 2019-01-11. This new collection of essays presents the latest thoughts of one of the world's leading ethnographic filmmakers and writers on cinema. It will provide essential reading for students in cinema studies, filmmaking, and visual anthropology. The dozen wide-ranging essays give unique insights into the history of documentary, how films evoke space, time, and physical sensations, and the intellectual and emotional links between filmmakers and their subjects. In an era of reality television, historical reenactments, and designer packaging, MacDougall defends the principles that inspired the earliest practitioners of documentary cinema. He urges us to consider how the form can more accurately reflect the realities of our everyday lives. Building on his own practice in filmmaking, he argues that this means resisting the pressures for self-censorship and the inherent ethnocentrism of our own society and those we film.
