A History of Business in Medieval Europe, 1200-1550 Edwin S. Hunt,James M. Murray,1999-03-28 This book demolishes the widely held view that the phrase medieval business is an oxymoron The authors review the entire range of business in medieval western Europe probing its Roman and Christian heritage to discover the economic and political forces that shaped the organization of agriculture manufacturing construction mining transportation and marketing Businessmen s responses to the devastating plagues famines and warfare that beset Europe in the late Middle Ages are equally well covered Medieval

businessmen's remarkable success in coping with this hostile new environment was a harvest of adversity that prepared the way for the economic expansion of the sixteenth century. Two main themes run through this book. First, the force and direction of business development in this period stemmed primarily from the demands of the elite. Second, the lasting legacy of medieval businessmen was less their skillful adaptations of imported inventions than their brilliant innovations in business organization.

An Illustrated History of Late Medieval England Chris Given-Wilson, 1996. The late Middle Ages c. 1200–1500 was an age of transition. The major events of this period—the Black Death, the Hundred Years War, the rise of Parliament, the depositions of five English kings between 1327 and 1483—are examined in detail in this book. [A History of England, Volume 1](#) Clayton Roberts, F. David Roberts, Douglas Bisson, 2016-07-01. This two-volume narrative of English history draws on the most up-to-date primary and secondary research, encouraging students to interpret the full range of England's social, economic, cultural, and political past. [A History of England, Volume 1: Prehistory to 1714](#) focuses on the most important developments in the history of England through the early 18th century. Topics include the Viking and Norman conquests of the 11th century, the creation of the monarchy, the Reformation, and the Glorious Revolution of 1688. [The Military Orders, Volume I](#) Malcolm Barber, 2017-07-05. This book contains 42 papers delivered at the International Conference on Military Orders held at Clerkenwell, London, in September 1992. There are five sections covering the Hospitallers, the Templars, the Teutonic Knights, the Spanish Orders, and the perceptions and role of the orders. The impact of the military orders on European History has been profound, both in what they achieved and in the way interpretations of these achievements have since shaped European perceptions. Their influence can be found in places as far apart as Lithuania and Andalusia, Scotland and Palestine, and their chronological range extends from their origins in the 12th century down to the present day. This importance is fully reflected in this book, where the latest research is brought together through the contributions of scholars from 13 countries.

Peacemaking and the Restraint of Violence in High Medieval Europe Simon Leboutteiller, Louisa Taylor, 2023-10-04. The High Middle Ages have been seen as an important point within the development of governmental and administrative bureaucracy, as well as a time in which there was frequent conflict. This volume addresses the methods by which violence was regulated and mitigated, and peaceful relations were re-established in high medieval Europe. By studying the restraint of violence and the imposition of peace, the chapters in this volume contribute to interdisciplinary discussions about the effects that violence had on medieval societies. The wide-ranging geographical scope of this volume invites comparisons to be made in relation to how violence was restrained and peace established in different settings. The chapters in the first part of this volume address the issue of how violence was moderated and curbed during and following periods of conflict. The second part explores attempts to maintain peace and the processes which developed to deal with those viewed as having broken the peace. The final part of this volume explores the ways in which conflict was avoided.

The Catholic Church and European State Formation, AD 1000-1500 Jørgen Møller,Jonathan Stavnskær Doucette,2022-06-13

Generations of social scientists and historians have argued that the escape from empire and consequent fragmentation of power across and within polities was a necessary condition for the European development of the modern territorial state modern representative democracy and modern levels of prosperity The Catholic Church and European State Formation AD 1000 1500 inserts the Catholic Church as the main engine of this persistent international and domestic power pluralism which has moulded European state formation for almost a millennium The crisis of church and state that began in the second half of the eleventh century is argued here as having fundamentally reshaped European patterns of state formation and

regime change It did so by doing away with the norm in historical societies sacral monarchy and by consolidating the two great balancing acts European state builders have been engaged in since the eleventh century against strong social groups and against each other The book traces the roots of this crisis to a large scale breakdown of public authority in the Latin West which began in the ninth century and which at one and the same time incentivised and permitted a religious reform movement to radically transform the Catholic Church in the period from the late tenth century onwards Drawing on a unique dataset of towns parliaments and ecclesiastical institutions such as bishoprics and monasteries the book documents how this church reform movement was crucial for the development and spread of self government the internal balancing act and the weakening of the Holy Roman Empire the external balancing act in the period AD 1000 1500 *The Wine Trade in Medieval Europe 1000-1500* Susan Rose, 2011-06-23 Wine has held its place for centuries at the heart of social and cultural life in western Europe This book explains how and why this came about providing a thematic history of wine and the wine trade in Europe in the middle ages from c 1000 to c 1500 Wine was one of the earliest commodities to be traded across the whole of western Europe Because of its commercial importance more is probably known about the way viticulture was undertaken and wine itself was made than the farming methods used with most other agricultural products at the time Susan Rose addresses questions such as Where were vines grown at this time How was wine made and stored Were there acknowledged distinctions in quality How did traders operate What were the social customs associated with wine drinking What view was taken by moralists How important was its association with Christian ritual Did Islamic prohibitions on alcohol affect the wine trade What other functions did wine have
