Ancient Near East Greece and Rome is a volume dedicated to investigating the relationship between religion and war in antiquity in minute detail. The nineteen chapters are divided into three groups: the ancient Near East, Greece, and Rome. They are presented in turn, and all possible aspects of warfare and its religious connections are investigated. The contributors focus on the theology of war, the role of priests in warfare, natural phenomena as signs for military activity, cruelty, piety, the divinity of humans in specific martial cases, rituals of war, iconographical representations and symbols of war, and even the archaeology of war. As editor Krzysztof Ulanowski invited both well-known specialists such as Robert Parker, Nicholas Sekunda, and Pietro Mander to contribute, as well as many young talented scholars with fresh ideas. From this polyphony of voices, perspectives, and opinions emerges a diverse but coherent representation of the complex relationship between religion and war in antiquity.

This encyclopedia opens the world of the ancient Greeks, spanning Greek history from the Bronze Age through Roman times, with an emphasis on the Classical and Hellenistic Eras. The encyclopedia provides roughly 270 easily accessible entries on topics essential to understanding everything from Greek high culture to daily life. These entries are grouped in topical sections on the arts, science, and technology, politics and government, domestic life, and other subjects. Sidebars on particularly noteworthy people, places, and concepts provide related information, while primary documents allow readers to delve into the mindset and feelings of the ancient Greeks themselves.
