Historical Dictionary of Arms Control and Disarmament

Jeffrey A. Larsen, James M. Smith, 2005-03-25 Historical Dictionary of Arms Control and Disarmament also provides information that is comprehensible to all readers Jeffrey A Larsen and James M Smith present a context for the broader range of international relations at a given point in time extending the utility of the dictionary beyond just a narrow examination of arms control **BOOK JACKET**

Small Arms and Security Denise Garcia, 2006-09-27 This book examines the emergence of new international norms to govern the spread of small arms and the extent to which these norms have been established in the policies and practices of states regions and international organizations It also attempts to establish criteria for assessing norm emergence and to assess the process of norm development by comparing what actually happens at the multilateral level If norm making on small arms and related multilateral negotiations have mostly dealt with illicit arms and most of the norms examined here fall on the arms supplier side of the arms equation the author argues that the creation of international norms and the setting of widely agreed standards amongst states on all aspects of the demand for availability and spread of both legal and illegal small arms and light weapons must become central to the multilateral coordination of policy responses in order to tackle the growing violence associated with small arms availability Small Arms and Security will be of interest to researchers and professionals in the fields of peace and conflict studies global governance international security and disarmament

Vital Signs 1998 Lester R. Brown, Michael Renner, Christopher Flavin, 1998 Analyzes the key indicators of 1998 that will play a large part in determining the social economical and environmental health of the nation in the next decade includes charts tables graphs and statistics

Terrornomics Sean S. Costigan, David Gold, 2016-03-16

Today no single issue dominates the global political landscape as much as terrorism Aware of their unique position in the newly unipolar world terrorist leaders have articulated that economic warfare is a key component of the new terrorist agenda Governments have accentuated the role of economic tools in their counter terrorism policies while maintaining emphasis on the application of military force or hard power even though such tools often prove unnecessarily blunt or even sorely inadequate Given the complexity of the global threat posed by modern transnational terrorist groups combating terrorism with a mix of hard and soft power is more important than ever As an invaluable new book in terrorism studies Terrornomics brings together contributions from renowned international scholars and practitioners to provide a multifaceted view of contemporary financial counterterrorism and terrorist funding efforts It employs key concepts terms case studies and policy recommendations to advance our understanding of the threats and possible courses of action thus enabling us to grasp the critical financial and economic issues while providing potential counterterrorist strategies

Vital Signs 1998-1999

Lester R. Brown, 2014-04-08 First Published in 1998 In this seventh annual edition of VITAL SIGNS the team at the Worldwatch Institute bring together an eclectic selection of disparate trends to offer a unique multifaceted view of our

rapidly changing world This vital resource and reference guide traces the scientific social economic and environmental trends that have and continue to shape our world Among the trends covered for the first time in VITAL SIGNS 1998 99 are frontier forests plantation forestry satellite launches minerals exploration small arms proliferation and female education This year's edition points out that global emissions of carbon the leading contributor to global climate change hit another new high while wind power has grown an amazing 26 per cent per year and sales of solar cells jumped a phenomenal 43 per cent in 1997 VITAL SIGNS is the most comprehensive source of environmental and social information available *The Future of Inter-American Relations* Jorge I. Dominguez, 2013-10-23 Jorge I Dominguez has brought together experts from Latin America the Caribbean and the US to explore transnational aspects of crime migration trade security democracy and international financial institutions in the Americas They consider the effect of drug trafficking on government the economy and the rule of law at both national and hemispheric levels They look at the policy implications of migration and immigration trends as well as trends in international trade Assessing how to promote peace and democracy in the region several essays examine regional issues and institutions Others analyze the role of international financial institutions such as the IMF and the World Bank in promoting economic reforms Commissioned by the Inter American Dialogue this collection contributes to the debate on the future direction of inter American relations

The Socio-Economic Impacts of Artisanal and Small-Scale Mining in Developing Countries G.M. Hilson, 2003-01-01 The purpose of this book is to examine both the positive and negative socioeconomic impacts of artisanal and small scale mining in developing countries In recent years a number of governments have attempted to formalize this rudimentary sector of industry recognizing its socioeconomic importance However the industry continues to be plagued by

Light Weapons and Civil Conflict Jeffrey Boutwell, Michael T. Klare, 1999 A common feature of conflict in the 1990s is death and suffering from small arms and light weapons The global diffusion of assault rifles machine guns mortars and rocket propelled grenades which can be easily carried by an individual or transported by a light vehicle has greatly intensified the violence of conflicts in countries around the world This book represents the perspectives of the foremost specialists on light weapons and it surveys the wide range of policy options open to the international community These include export and import controls law enforcement strategies to break up black markets collection and destruction of weapons following the end of conflict and efforts to illuminate how small arms and light weapons make their way to the killing grounds of the 1990s

State of the World 2002 Christopher Flavin, 2002 In *State of the World 2002* the Worldwatch Institute's award winning research team describes how to meet the complex challenges of restoring a sustainable balance between the growing human population rising levels of consumption and the threats to the natural systems that support all life on the Earth The book provides concerned citizens and national leaders with comprehensive analysis of the global environmental problems we face together with detailed descriptions of practical innovative solutions like charting the most environmentally sound path to a hydrogen fueled economy or accelerating the

rapidly growing conversion of farmers worldwide to organic farming and sustainable agriculture Written in clear and concise language with easy to read charts and tables State of the World 2002 presents a view of our changing world that we and our leaders cannot afford to ignore Copyright Libri GmbH All rights reserved **Building Sustainable Peace** Tom Keating,W. Andy Knight,2012-07-02 As the world turns its attention to the reconstruction of Afghanistan and Iraq following recent conflicts in these countries the issue of post conflict peacebuilding takes centre stage This collection presents a timely and original overview of the field of peace studies and offers fresh analytical tools which promote a critical reconceptualization of peace and conflict while also making specific reference to peacebuilding strategies employed in recent international conflicts

Human Security and the UN S. Neil MacFarlane,Yuen Foong Khong,2006-02-13 How did the individual human being become the focus of the contemporary discourse on security What was the role of the United Nations in securing the individual What are the payoffs and costs of this extension of the concept Neil MacFarlane and Yuen Foong Khong tackle these questions by analyzing historical and contemporary debates about what is to be secured From Westphalia through the 19th century the state s claim to be the object of security was sustainable because it offered its subjects some measure of protection The state s ability to provide security for its citizens came under heavy strain in the 20th century as a result of technological strategic and ideological innovations By the end of World War II efforts to reclaim the security rights of individuals gathered pace as seen in the Universal Declaration of Human Rights and a host of United Nations covenants and conventions MacFarlane and Khong highlight the UN s work in promoting human security ideas since the 1940s giving special emphasis to its role in extending the notion of security to include development economic environmental and other issues in the 1990s *Vital Signs 2003-2004* Worldwatch Institute,2021-04-14 This annual volume from the Worldwatch Institute gives prominence to key trends that often escape the attention of the news media world leaders and economic experts The book distils 36 vital signs of our times from thousands of governmental industrial and scientific sources allowing readers to track key indicators that show our social economic and environmental progress or lack of it Each trend is presented in both text and graphics providing a thorough overview **An International Register of Small Arms and Light Weapons** Angus Brown,Canada. Department of Foreign Affairs and International Trade,1998 There has been growing awareness in the world of the problems created by the global surplus of small arms and light weapons One of the approaches suggested to enhance transparency about the legal manufacture and trade of such weapons is the creation of an arms register for these types of weapons The aim of this paper is to discuss relevant practical considerations for a potential small arms and light weapons register to help ensure that it is a worthwhile and viable measure and to propose a model which may be followed in establishing such a register The first part highlights some of the general points to be considered when designing a light weapons register including its scope or content organization and operation Part two outlines a model for such a register with a possible format and explanatory notes for a register based on the points noted in the first part of the

paper Sample data forms are included *The Logic of Humanitarian Arms Control and Disarmament* Nik Hynek, Anzhelika Solovyeva, 2020-11-10 This novel and original book examines and disaggregates theoretically and empirically operations of power in international security regimes These regimes varying in degree from regulatory to prohibitory are understood as sets of normative discourses political structures and dependencies anarchies hierarchies and heterarchies and agencies through which power operates within a given security issue area with a regulatory effect In International Relations regime analysis has been dominated by several generations of regime theory theorization As this book makes clear not only has the IR Regime Theory been of limited utility for security domain due to its heavy focus on economic and environmental regimes but it too heuristically suffered from its rigid pegging to general IR Theory It is not surprising then that the evolution of IR Regime Theory has largely been mirroring the evolution of IR Theory in general from the neo realist neo liberal institutionalist convergence regime theory through cognitivism to constructivist regime theory The commitment of this book is to remedy this situation by bringing together robust power analysis and international security regimes It provides the reader with a theoretically and empirically uncompromising and comprehensive analysis of the selected international security regimes which goes beyond one or another school of IR Regime Theory In doing so it completely abandons existing and piecemeal analysis of regimes within the intellectual field of IR based on conventional grand mid range theorization

Demilitarisation and Peace-Building in Southern Africa Peter Batchelor, 2018-12-17 First published in 2004 this work is based on a collaborative research project this trilogy considers the dynamics of demilitarisation and peace building in southern Africa in the aftermath of major violent conflicts The overall aim of the research is to support and facilitate the achievement of sustainable peace and human development in southern Africa by analysing demilitarisation and peace building processes in the region and identifying policy options and interventions for peace building The central focus of the research is the extent to which demilitarisation following the termination of wars has contributed to broad processes of peace building in the affected region Has the military in southern Africa downsized and refocused towards new roles Has there been a peace dividend allowing more investment in economic and human development thereby dealing with some of the root causes of conflict Volume I provides a conceptual framework for the analysis of demilitarisation and peace building processes applicable particularly in the southern Africa context This volume argues that a broad concept of peace building has to take into account economic political social and cultural factors at the local national and regional level **Protean Power** Peter J. Katzenstein, Lucia A. Seybert, 2018-01-18 Mainstream international relations continues to assume that the world is governed by calculable risk based on estimates of power despite repeatedly being surprised by unexpected change This ground breaking work departs from existing definitions of power that focus on the actors evolving ability to exercise control in situations of calculable risk It introduces the concept of protean power which focuses on the actors agility as they adapt to situations of uncertainty Protean Power uses twelve real world case studies to examine how the dynamics of protean and

control power can be tracked in the relations among different state and non state actors operating in diverse sites stretching from local to global in both times of relative normalcy and moments of crisis Katzenstein and Seybert argue for a new approach to international relations where the inclusion of protean power in our analytical models helps in accounting for unforeseen changes in world politics **Failed States and Institutional Decay** Natasha M. Ezrow, Erica

Frantz, 2013-07-18 What do we mean by failed states and why is this concept important to study The failed states literature is important because it aims to understand how state institutions or lack thereof impact conflict crime coups terrorism and economic performance In spite of this objective the failed state literature has not focused enough on how institutions operate in the developing world This book unpacks the state by examining the administrative security judicial and political institutions separately By doing so the book offers a more comprehensive and clear picture of how the state functions or does not function in the developing world merging the failed state and institutionalist literatures Rather than merely describing states in crisis this book explains how and why different types of institutions deteriorate Moreover the book illustrates the impact that institutional decay has on political instability and poverty using examples not only from Africa but from all around the world *The Global War on Your Guns* Wayne R. LaPierre, 2006 **Understanding Peace** Michael Allen

Fox, 2013-11-12 Understanding Peace A Comprehensive Introduction fills the need for an original contemporary examination of peace that is challenging informative and empowering This well researched fully documented and highly accessible textbook moves beyond fixation on war to highlight the human capacity for nonviolent cooperation in everyday life and in conflict situations After deconstructing numerous ideas about war and explaining its heavy costs to humans animals and the environment discussion turns to evidence for the existence of peaceful societies Further topics include the role of nonviolence in history the nature of violence and aggression and the theory and practice of nonviolence The book offers two new moral arguments against war and concludes by defining peace carefully from different angles and then describing conditions for creating a culture of peace Understanding Peace brings a fresh philosophical perspective to discussions of peace and also addresses down to earth issues about effecting constructive change in a complex world The particular strength of Understanding Peace lies in its commitment to reflecting on and integrating material from many fields of knowledge This approach will appeal to a diverse audience of students and scholars in peace studies philosophy and the social sciences as well as to general interest readers
