Small Animal Clinical Pharmacology:

Small Animal Clinical Pharmacology Jill E. Maddison, Stephen W. Page, David B. Church, 2008 Small Animal Clinical Pharmacology is a practical clinically oriented pharmacology text designed to provide the veterinary student and practitioner with all the relevant information needed when designing drug treatment regimens for pets in small animal veterinary practice. Comprehensively updated and revised the second edition of this core text covers essential new information on drugs used in the management of a range of presenting conditions including heart disease and cardiac arrhythmias. For the second edition new authors, superb new illustrations and a second colour have all been introduced. With its unique approach combining a thorough understanding of the pharmacological action of drugs with a basic understanding of the relevant physiology and pathophysiology of systems and tissues affected, Small Animal Clinical Pharmacology continues to be an indispensable book for all veterinary students and practitioners. Organised by drug class in a uniform and detailed structure which means it is easy to locate key information on dose rates, routes of administration, drug interactions and special considerations at a glance. Key chapters based around treatment of disorders of particular body systems eg cardiovascular and thyroid disorders. Essential introductory chapters covering pharmacokinetics, general pharmacological principles and adverse reactions for a thorough basic grounding in the subject. All authors are experienced clinicians and recognised experts in their field who bring a down to earth and practical approach to the text.

Small Animal Clinical Pharmacology Jill E. Maddison, Stephen W. Page, David B. Nutraceuticals Tariq Altalhi,Jorddy Neves Cruz,Inamuddin,2023-03-31 Nutraceuticals Sources Processing Methods

Properties and Applications explores the impact of nutraceutical compounds on human health and their main pharmacological contributions. Organized into three parts, this book addresses nutraceutical production, applications for disease prevention and treatment, and current trends, especially the role of nutraceuticals in cosmeceuticals. Nutraceuticals are a class of products that can help people improve their health, reduce the risk of disease, extend their lives, and control the structure and functioning of their bodies. However, due to multiple hurdles that prevent nutraceuticals from circulating in an active form in the body, their use is associated with diminished therapeutic efficacy. Recognizing this problem, the book explores the root of the nutraceutical delivery system and its codelivery methods, with a focus on medicines. With contributions from experienced nutraceutical experts, this book serves as a valuable reference for nutrition researchers, food scientists, pharmacologists, and those who are researching and studying in related areas. It discusses nutraceutical applications and compounds and the current trends in this emerging field. Explores the production of nutraceuticals. Written and edited by experienced researchers in this field.
