Scientific and Technical Aerospace Reports ,1976 Lists citations with abstracts for aerospace related reports obtained

from world wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database

Participatory Budgeting in Global Perspective Brian Wampler, Stephanie McNulty, Michael Touchton, 2021-07-15 Participatory Budgeting continues to spread across the globe as government officials and citizens adopt this innovative democratic program in the hopes of strengthening accountability civil society and well being Governments often adapt PB s basic program design to meet local needs thus creating wide variation in how PB programs function Some programs retain features of radical democracy others focus on community mobilization and yet other programs seek to promote participatory development Participatory Budgeting in Global Perspective provides a theoretical and empirical explanation to account for widespread variation in PB s adoption adaptation and impacts This book develops six PB types to account for the wide variation in how PB programs function as well as the outcomes they produce To illustrate the similar patterns across the globe four empirical chapters present a rich set of case studies that illuminate the wide differences among these programs chapters are organized regionally with chapters on Latin America Asia Sub Saharan Africa Europe and North America By organizing the chapters regionally it becomes clear that there are temporal spatial economic and organizational factors that produce different programs across regions but similar programs within each region A key empirical finding is that the change in PB rules and design is now leading to significant differences in the outcomes these programs produce We find that some programs successfully promote accountability expand civil society and improve well being but too often researchers do not have any evidence tying PB to significant social or political change

**Machine Learning Approaches to Human Movement Analysis** Matteo Zago, Peter A. Federolf, Ana Francisca Rozin Kleiner, 2021-03-04
