The Culling Robert Johnson, 2014-02-20 Carl Sims a young virologist discovers a plot hatched by a group of international scientists to cull in a matter of weeks two thirds of the world s population some 4 5 billion people by releasing a deadly virus that kills two thirds of those it infects Their goal is to reduce Earth s population from an unsustainable seven billion to two billion What is he to do Try to stop the conspiracy or join it Horrific yes but what if this culling could prevent the extinction of some forty percent of our planet s flora and fauna Or if he was certain it was the only way to prevent an even larger human die off incurring significantly more suffering by the end of this century Or if he were convinced it represented the only hope for humanity surviving at all This is at the heart of this thriller for these viruses do in fact exist Most everything that plagues mankind today the highest concentration of atmospheric CO2 in 3 million years escalating extinction rates habitat loss fishery collapses climate change polar and glacial ice thaws arable land loss desertification aquifer depletions ocean acidification unprecedented air pollution looming famine and social unrest stems from over consumption which unchecked will lead to Earth s sixth mass extinction event Robert Johnson s first novel tackles an issue that most in the media the arts and entertainment industry even the environmental community are afraid to discuss directly overpopulation Despite the potential for despair or preachy diatribes the gravity of the issues is woven into the story with plenty of colorful characters gallows humor and a suspenseful plot that unravels across continents making for an entertaining and thought provoking debut New York Journal of Books This is so real it is frightening although the characters are fictional the story is possible and very likely The book will keep you awake nights thinking about our vulnerability and worried that we ve already gone too far for the planet to survive without a culling Pulp Den Johnson s debut thriller could be more science fact than science fiction There s a scheme afoot by rogue scientists to release a virulent flu virus and kill two thirds of Earth s population a megalomaniacal plot to save the planet from becoming a lifeless rock due to climate change and overpopulation A scary premise Get a flu shot Wash your hands regularly Kirkus
