The Textbook of Children's Nursing Tina Moules,Joan Ramsay,1998 Divided into three sections this book provides coverage of the Branch Programme in Children s Nursing It includes user friendly content based on lecture plans and activities It is a useful

reading for those students embarking on a course of study in children's nursing Morbidity and Mortality Weekly Report, 1999 **Tobacco or Health?** Knut-Olaf Haustein, David Groneberg, 2009-09-21 This book comprehensively summarizes the adverse effects of tobacco smoking on human health. The current second edition has integrated a large set of new data that have been published in numerous scientific studies and meta-analyses over the past few years. Unfortunately, the harmful sequelae of tobacco smoking are played down by the industry and politicians in many industrialized countries. However, about 800 000 people a year in the EU die from the immediate consequences of smoking. The particularly insidious feature of tobacco consumption is that smoking-attributable harmful effects on health do not generally become apparent until three or four decades after smoking initiation. Although some positive changes in the legislative handling of tobacco have appeared in the past five years, we still need to form a pact sealed by politicians, the medical professionals, teachers and the media to target the problem across nations. In this respect, a minority of countries including the US and the UK have given positive examples. There are four areas that need to be improved in future: 1. strict bans on tobacco advertisement on a global level; 2. better measures to protect against side-stream passive smoke exposure; 3. establishment of prevention programs especially for children; and 4. treatment of tobacco addiction Statistical News, 1997
