A Spatial Database for Restoration Management Capability on National Forests in the Pacific Northwest USA Chris Ringo, Alan A. Ager, Michelle A. Day, Sarah Ann Crim, 2016 Understanding the capacity to reduce wildfire risk and restore dry forests on Western national forests is a key part of prioritizing new accelerated restoration programs initiated by the Forest Service Although a number of social and biophysical factors influence the ability to implement restoration programs one key driver is the suite of forest plan land designations and associated management directions These land use designations and conservation reserves which are intended to provide an array of ecosystem services recreation wildlife water timber research etc were created under the National Forest Management Act In many cases they have subsequently been updated to account for legislated protection for threatened and endangered species Individual land designations have distinct properties in terms of biophysical settings fire regimes and a myriad of management constraints intended to conserve landscape resiliency over time Despite the importance of forest plan designations for assessing restoration capacity standardized spatial data at regional scales do not exist making comprehensive regional and national assessments of restoration potentials and priorities difficult As part of a broader study of restoration potential in the Forest Service's Pacific Northwest Region we obtained spatial data from existing forest plans and categorized more than 800 different land designations into five distinct categories according to management restrictions then created a seamless spatial dataset for the region We then examined the composition of the different categories of management with respect to the dominant fire regime We also generated an atlas of management categories which we are calling Land Classes of the national forests in the region which can be used to understand the spatial distribution of management restrictions on individual forests The data enable broader scale assessments and prioritization analyses within the region and provide a case study template for other regions to follow to further advance national scale assessments of restoration and fuel management potential

Political Standards Karthik Ramanna, 2015-11-09 Assembling compelling and unprecedented evidence Political Standards Accounting for Legitimacy documents how in subtle ways the rules of corporate accounting a critical institution in modern market capitalism have been captured to benefit industrial corporations financial firms and audit firms In what is perhaps the only independent overview of the accounting industry Karthik Ramanna begins with a history of corporate accounting and an accessible explanation of how it works today including the essential roles it plays in defining the fundamental notion of profitability facilitating asset allocation and ensuring the accountability of corporations and their managers From the evidence Ramanna shows how accounting rule makers selectively co-opt conceptual arguments from academia and elsewhere to advance the views of the special interest groups From this Ramanna

moves on to develop more broadly a new type of regulatory challenge that of producing public policy in a thin political market His argument is that accounting rules cannot be determined without the substantial expertise and experience of groups that by definition also have strong commercial interests in the outcome Political Standards concludes with an exploration of possible solutions to the problem in accounting and that of thin political markets in general charting avenues for scholarship and practice Certain to be an eye opening account of a massive industry central to the modern business world Political Standards will be an essential resource in understanding how the rules of the game business are set whom they inevitably favor and how they can be changed for the better of society Information and Public Choice Roumeen

Contractual Politics and the Institutionalization of Bureaucratic Influence Glenn R. Parker,Suzanne L. Parker,2018-01-01 Analyzes long term interest group party alliances with a focus on the part played by federal advisory committees This book sheds light on the dealings between special interests and political parties by challenging three long standing assumptions that transactions between interest groups and parties are quid pro quo exchanges such as the buying and selling of legislation that the interrelationship between bureaucrats and interest groups is accommodating and friendly and that special interests are single minded in their pursuit of favorable policies specifically legislation and regulations The authors

argue that political transactions are organized through durable informal agreements between interest groups and political parties whereby parties obtain a dependable source of long term campaign funds and interest groups gain enduring favorable treatment in the political process In response to interest group demands legislatures such as Congress establish quasi governmental appendages to federal agencies that oversee the administration of programs prized by special interests namely federal advisory committees The authors examine the complex relationship between the establishment and influence of thousands of federal advisory committees and long term interest group contributions to political parties This book is the single best study of federal advisory committees with reams of data about them It is also one of the best books on contractual politics pulling together a wealth of ideas about the utility of that approach by scholars who really understand it well Paul Teske author of *Regulation in the States* *Shasta-Trinity National Forest (N.F.), Land and Resource(s) Management Plan (LRMP)* ,1995 **Appreciating Asperger Syndrome** Brenda Boyd,2009-02-15 Brenda Boyd shows that for every characteristic of AS that can be looked at negatively there are several positive aspects that can be drawn on and developed Discussing AS in general terms she talks through the reasons why people with AS approach life in the way they do and what an enormous contribution they make to the world [Catalog of Federal Education Assistance Programs](#) ,1980
