Global Library and Information Science Ismail Abdullahi, 2009-05-05 This book presents international librarianship and library science through insightful and well written chapters contributed by experts and scholars from six regions of the world The role of public academic special school libraries as well as library and information science education are presented from the early development to the present time Its lively readable approach will help the reader to understand librarianship in Africa Asia Australia and New Zealand Europe Latin America and the Caribbean the Middle East and North America Edited by Ismail Abdullahi Professor of Global Library and Information Science this book is a must read by library science students and teachers librarians and anyone interested in Global Librarianship

Interlibrary Loan Practices Handbook Virginia Boucher, 1997 In this new edition of the definitive Interlibrary Loan Practices Handbook edited by Cheri T. Weible and Karen Janke expert contributors clearly explain the complexities of getting materials for patrons from outside the library This collection presents a complete view of the interlibrary loan ILL process with contributions from all areas of the technical services community providing Guidance on how to do ILL efficiently and effectively with advice on being a considerate borrower and lender Details of preferred staffing and management techniques showing how best practices can be implemented at any institution Discussion of important issues that can fall between the cracks such as hidden copyright issues and the logistics of lending internationally As consortia and other library partnerships share ever larger fractions of their collections this book gives library staff the tools necessary for a smoothly functioning ILL system

Organizing Library Collections Gretchen L. Hoffman, 2019-08-05 Libraries organize their collections to help library users find what they need Organizing library collections may seem like a straightforward and streamlined process but it can be quite complex and there is a large body of theory and practice that shape and support this work Learning about the organization of library collections can be challenging Libraries have a long history of organizing their collections there are many principles models standards and tools used to organize collections and theory and practice are changing constantly Written for beginning library science students *Organizing Library Collections Theory and Practice* introduces the theory and practice of organizing library

collections in a clear straightforward and understandable way It explains why and how libraries organize their collections and how theory and practice work together to help library users It introduces basic cataloging and metadata theory describes and evaluates the major cataloging and metadata standards and tools used to organize library collections and explains in general how all libraries organize their collections in practice Yet this book not only introduces theory and practice in general it introduces students to a wide range of topics involved in organizing library collections This book explores how academic public school and special libraries typically organize their collections and why It also discusses standardization and explains how cataloging and metadata standards and policies are developed Ethical issues also are explored and ethical decision making is addressed In addition several discussion questions and class activities reinforce concepts introduced in each chapter Students should walk away from this book understanding why and how libraries organize their collections

Museum Librarianship, 2d ed. Esther Green Bierbaum, 2015-11-03 In this second edition to Museum Librarianship the author offers guidance in planning and providing information services in a museum beginning or revitalizing the library collection development and the bibliographic process technical services administration space and equipment requirements fundamental services extended information services and the information partnership between museums and their libraries The Internet and other electronic resources are fully covered The focus of this new edition has shifted slightly from mainly dealing with the start up aspects to an emphasis on the goals of library and information services in a museum and the processes through which such services can be achieved The author's underlying goal is to help enhance and enrich the encounter of the museum goer with enduring objects in a time when we all seem to be assailed on every side by random noise and flickering image

Weeding of Collections in Sci-Tech Libraries Ellis Mount, 2019-12-06 In this book first published in 1986 experts from the various specialties describe the weeding process in corporate academic and university libraries Factors affecting the weeding of materials lack of space a desire to place materials in a more suitable library changing goals of the library are explored Discussions concerning the choices for the disposal of items are insightful and innovative
