Remote Sensing Handbook - Three Volume Set Prasad Thenkabail, 2018-10-03 A volume in the three volume Remote Sensing Handbook series Remote Sensing of Water Resources Disasters and Urban Studies documents the scientific and methodological advances that have taken place during the last 50 years The other two volumes in the series are Remotely Sensed Data Characterization Classification and Accuracies and Land Reso Revisiting the Assessment of Second Language Abilities: From Theory to Practice Sahbi Hidri, 2018-01-12 This book presents an overview of revisiting the assessment of language abilities It also showcases how the measurement of such constructs can result in negative or positive washback and how outcomes might be conducive to repercussions that decide on the future of many stakeholders The 23 chapters were selected among tens of chapters received from different contexts that addressed the issue of revisiting the assessment of language abilities such as Tunisia Ukraine Algeria Russia KSA Sudan Egypt Canada Kurdistan UK USA Iran Turkey etc These contexts have highlighted the necessity to revisit the different constructs which should be assessed with a clear and straightforward foundation on students learning objectives and their actual language ability To do so most of the chapters present hands on use of relevant statistical tests that might serve in revisiting the construct definition both theoretically and operationally Perhaps the sole and intricate question that the authors of these contributions ask is what it means to revisit the assessment of the construct of individualized language ability and how In addition the book accentuates the momentousness and significance of reflecting on test fairness and validation as the mainspring and backbone for democratization of assessment This book appeals to a broad readership such as English Language Teaching ELT practitioners language teachers students testing organizations policy makers test designers writers of test specifications testing experts researchers program evaluators especially in the Middle East and North Africa MENA as well as other international contexts

Proceedings of the Joint Conference on Standard Setting for Large-scale Assessments of the National Assessment Governing Board (NAGB) and the National Center for Education Statistics (NCES):

Proceedings, 1995 Setting Performance Standards in Europe Spiros Papageorgiou, 2009 This publication was awarded the Jacqueline Ross TOEFL Dissertation Award in 2009 Since its publication in 2001 the Common European Framework of Reference CEFR has been the most frequently cited performance standard in language testing in Europe To help test providers and users with score interpretation in relation to the CEFR levels the Council of Europe published the Manual for relating language examinations to the CEFR Even though the linking process set out in the Manual is primarily based on judgements by trained participants judgement making in this context remains largely unexplored The research presented in this book addresses this issue by employing quantitative and qualitative methods Despite the judges good understanding of how language ability progresses from lower to higher CEFR levels it was found that describing test content and examinee

performance was not without problems and decision making was affected by a number of factors that were irrelevant to the judgement task The results provide a better understanding of judgement making during the CEFR linking process which has important implications for examination providers and users of CEFR aligned test scores

The Psychometrics of Standard Setting Mark Reckase,2023-01-31 This book provides a unifying structure for the activities that fall under the process typically called standard setting on tests of proficiency Standard setting refers to the methodology used to identify performance standards on tests of proficiency The results from standard setting studies are critical for supporting the use of many types of tests The process is frequently applied to educational psychological licensure certification and other types of tests and examination systems The literature on procedures for standard setting is extensive but the methodology for standard setting has evolved in a haphazard way over many decades without a unifying theory to support the evaluation of the methods and the validation of inferences made from the standards This book provides a framework for going beyond specific standard setting methods to gain an understanding of the goals for the methods and how to evaluate whether the goals have been achieved The unifying structure provided in this book considers policy that calls for the existence of performance standards the relationship of proficiency test design to the policy and tasks assigned to subject matter experts to help them convert the policy to estimates of locations on the reporting score scale for the test The book provides guidance on how to connect the psychometric aspects of the standard setting process to the intentions of policy makers as expressed in policy statements Furthermore the structure is used to support validity arguments for inferences made when using standards Examples are provided to show how the unifying structure can be used to evaluate and improve standard setting methodology

Large-scale Kernel Machines Léon Bottou,2007 Solutions for learning from large scale datasets including kernel learning algorithms that scale linearly with the volume of the data and experiments carried out on realistically large datasets Pervasive and networked computers have dramatically reduced the cost of collecting and distributing large datasets In this context machine learning algorithms that scale poorly could simply become irrelevant We need learning algorithms that scale linearly with the volume of the data while maintaining enough statistical efficiency to outperform algorithms that simply process a random subset of the data This volume offers researchers and engineers practical solutions for learning from large scale datasets with detailed descriptions of algorithms and experiments carried out on realistically large datasets At the same time it offers researchers information that can address the relative lack of theoretical grounding for many useful algorithms After a detailed description of state of the art support vector machine technology an introduction of the essential concepts discussed in the volume and a comparison of primal and dual optimization techniques the book progresses from well understood techniques to more novel and controversial approaches

Many contributors have made their code and data available online for further experimentation Topics covered include fast implementations of known algorithms approximations that are amenable to theoretical guarantees and algorithms that perform well in practice but are difficult to analyze theoretically Contributors L on Bottou Yoshua Bengio St phane Canu Eric Cosatto Olivier Chapelle Ronan Collobert Dennis DeCoste Ramani Duraiswami Igor Durdanovic Hans Peter Graf Arthur Gretton Patrick Haffner Stefanie Jegelka Stephan Kanthak S Sathiya Keerthi Yann LeCun Chih Jen Lin Ga lle Loosli Joaquin Qui onero Candela Carl Edward Rasmussen Gunnar R tsch Vikas Chandrakant Raykar Konrad Rieck Vikas Sindhwani Fabian Sinz S ren Sonnenburg Jason Weston Christopher K I Williams Elad Yom Tov **Large-scale 3D Data Integration** Sisi
