Developments in Counter-Terrorist Measures and Uses of Technology Helen Fenwick, 2013-09-13 This book considers some of the most notable aspects of the legal response to the war on terror post 9 11 and the use of technology to support them It examines the shift from a criminal justice response to the creation of a parallel preventive system running in tandem with it This system has tended to veer away from the commission of criminal offences or adherence to ordinary criminal justice safeguards Such a preventive strategy relies on targeting terrorist suspects those who it is thought may in future commit terrorist acts and curbing their actions with the aim of preventing terrorist activity before it occurs The book further considers the role that surveillance plays in the counter terrorist efforts of state or non state actors It also evaluates the counter productive effects that many of these measures have had This book was originally published as a special issue of International Review of Law Computers Technology

Preventive Justice Andrew Ashworth, Lucia Zedner, 2014-03-27 This book arises from a three year study of Preventive Justice directed by Professor Andrew Ashworth and Professor Lucia Zedner at the University of Oxford The study seeks to develop an account of the principles and values that should guide and limit the state s use of preventive techniques that involve coercion against the individual States today are increasingly using criminal law or criminal law like tools to try to prevent or reduce the risk of anticipated future harm Such measures include criminalizing conduct at an early stage in order to allow authorities to intervene incapacitating suspected future wrongdoers and imposing extended sentences or indefinite on past wrongdoers on the basis of their predicted future conduct all in the name of public protection and security The chief justification for the state s use of coercion is protecting the public from harm Although the rationales and justifications of state punishment have been explored extensively the scope limits and

principles of preventive justice have attracted little doctrinal or conceptual analysis This book re assesses the foundations for the range of coercive measures that states now take in the name of prevention and public protection focussing particularly on coercive measures involving deprivation of liberty It examines whether these measures are justified whether they distort the proper boundaries between criminal and civil law or whether they signal a larger change in the architecture of security In so doing it sets out to establish a framework for what we call Preventive Justice

Seeking Security G R Sullivan,Ian Dennis,2012-04-13 Many academic criminal lawyers and criminal law theorists seek to

resolve the optimum conditions for a criminal law fit to serve a liberal democracy Typical wish lists include a criminal law that intervenes against any given individual only when there is a reasonable suspicion that s he has caused harm to the legally protected interests of another or was on the brink of doing so Until there is conduct that gives rise to a reasonable suspicion of criminal conduct by an individual s he should be allowed to go about his or her business free from covert surveillance or other forms of intrusion All elements of crimes should be proved beyond any reasonable doubt Any punishment should be proportionate to the gravity of the wrongdoing and when the offender has served this punishment the account should be cleared and good standing recovered Seeking Security explores the gap between the normative aspirations of liberal criminal law scholarship and the current criminal law and practice of Anglophone jurisdictions The concern with security and risk which in large part explains the disconnection between theory and practice seems set to stay and is a major challenge to the form and relevance of a large part of criminal law scholarship

Violence **Transnational Marriage and Partner Migration** Anne-Marie D'Aoust, 2022-02-11 This multidisciplinary collection investigates the ways in which marriage and partner migration processes have become the object of state scrutiny and the site of sustained political interventions in several states around the world Covering cases as varied as the United States Canada Japan Iran France Belgium or the Netherlands among others contributors reveal how marriage and partner migration have become battlegrounds for political participation control and exclusion Which forms of attachments towards the family the nation or specific individuals have become framed as risks to be managed How do such preoccupations translate into policies With what consequences for those affected by them in terms of rights and access to citizenship The book answers these questions by analyzing the interplay between issues of security citizenship and rights from the perspectives of migrants and policymakers but also from actors who negotiate encounters with the state such as lawyers non governmental organizations and translators

Extraterritorial Matthew Hart, 2020-08-25 The future of fiction is neither global nor national Instead Matthew Hart argues it is trending extraterritorial Extraterritorial spaces fall outside of national borders but enhance state power They cut across geography and history but do not point the way to a borderless new world They range from the United Nations headquarters and international waters to CIA black sites and the departure zones at international airports The political geography of the present Hart shows has come to resemble a patchwork of such spaces Hart reveals extraterritoriality's centrality to twenty first century art and fiction He shows how extraterritorial fictions expose the way states construct global space in their own interests Extraterritorial novels teach us not to mistake cracks or gradations in political geography for a crisis of the state Hart demonstrates how the unstable character of many twenty first century aesthetic forms can be traced to the increasingly extraterritorial nature of contemporary political geography Discussing writers such as Margaret Atwood J G Ballard Amitav Ghosh Chang rae Lee Hilary Mantel and China Mi ville as well as artists like Hito Steyerl and Mark Wallinger Hart combines lively critical readings of contemporary novels with historical and theoretical discussions about sovereignty globalization cosmopolitanism and postcolonialism Extraterritorial presents a new theory of literature that explains what happens when dreams of an open connected world confront the reality of mobile elastic and tenacious borders
