Bibliography of Semiotics, 1975-1985, 1986-01-01 This bibliography of semiotic studies covering the years 1975-1985 impressively reveals the world wide intensification in the field. During this decade national semiotic societies have been founded all over the world; a great number of international, national, and local semiotic conferences have taken place; the number of periodicals and book series devoted to semiotics has increased; as has the number of books and dissertations in the field. Grammar in Use Across Time and Space Misumi Sadler, 2007 This monograph contains the first systematic investigation of the Japanese dative subject construction across time and space. It demonstrates that in order to capture what speakers/writers know about how to put an utterance or a clause together, it is necessary to pay attention to what they do in actual language use and in different discourse types. The work also shows the importance of diachronic perspectives to help us better understand the ways in which a particular grammatical structure is represented synchronically. By utilizing modern Japanese conversation, contemporary Japanese novels, and a pre-modern and modern Japanese literature corpus, the study highlights the role of dative subjects at the semantic and discourse/pragmatic levels. Specifically, it demonstrates that what has been considered to be a most grammatical aspect of Japanese actually turns out to be rather pragmatically oriented.

A Bibliography on Writing and Written Language Konrad Ehlich, Florian Coulmas, Gabriele Graefen, 2011-06-01 The bibliography offers information on research about writing and written language over the past 50 years. No comprehensive bibliography on this subject has been published since Sattler's 1935 handbook. With a selection of some 27,500 titles, it covers the most important literature in all scientific fields relating to writing. Emphasis has been placed on the interdisciplinary organization of the bibliography, creating many points of common interest for literacy experts, educationalists, psychologists, sociologists, linguists, cultural anthropologists, and historians. The bibliography is organized in such a way as to provide the specialist as well as the researcher in neighboring disciplines with access to the relevant literature on writing in a given field. While necessarily selective, it also offers information on more specialized bibliographies. In addition, an overview of norms and standards concerning script and writing will prove very useful for non-professional readers. It is therefore also of interest to the generally interested public as a reference work for the humanities.
