Speed Merchants Vijay Lokapally, Gulu Ezekiel, 2020-11-20 Indian cricket was traditionally known for its spin bowling All that changed with the advent of the magnificent Kapil Dev in 1978 The floodgates really opened in the new millennium with Javagal Srinath Zaheer Khan and Irfan Pathan leading a revolution that today sees India's pace attack as among the best in the world But how many know that from the late 19th century right till the 1940s it was fast bowlers that shaped the early years of Indian cricket From Pavri and Bulsara to Nissar and Amar Singh batsmen from around the world found Indian pace bowling too hot to handle

The Best Service is No Service Bill Price, David Jaffé, 2011-09-14 In this groundbreaking book Bill Price and David Jaffe offer a new game changing approach showing how managers are taking the wrong path and are using the wrong metrics to measure customer service Customer service they assert is only needed when a company does something wrong eliminating the need for service is the best way to satisfy customers To be successful companies need to treat service as a data point of dysfunction and figure what they need to do to eliminate the demand The Best Service Is No Service outlines these seven principles to deliver the best service that ultimately leads to no service Eliminate dumb contacts Create engaging self service Be proactive Make it easy to contact your company Own the actions across the company Listen and act Deliver great service experiences

Holley made speed parts for 4 cylinder Model T engines and accomplished speeds of up to 100 mph In Vintage Speed Parts The Equipment That Fueled the Industry veteran hot rod historian Tony Thacker looks at the history of hot rodding through the eyes of speed equipment manufacturers Covered chronologically the book begins with the early 4 cylinder engines In 1932 Henry Ford introduced the flathead V 8 which was slow to be adopted as the engine of choice in racing until the parts industry caught up Once it did the flathead although interrupted by the war was the engine to run until the automobile manufacturers introduced overhead valve V 8 engines in the late 1940s Chrysler s early 1950s Hemi and Chevrolet s small block V 8 in 1955 spelled the end for the flathead Both mills dominated well into the 1970s and the speed industry was there to support all platforms in spades During that period every auto manufacturer made a V 8 worthy of modification and the speed industry boomed Eventually the speed equipment manufacturers grew to the point of becoming corporate entities as mergers and acquisitions became the much less interesting story Parts covered include special cylinder heads magnetos camshaft and valvetrain upgrades downdraft carburetors headers multiple carburetor setups and even superchargers Everyone figured out how to make engines more powerful upgrading with the type of parts that were being produced decades later even to today Join in the fun of reviewing the history of speed through this fascinating tale of vintage speed parts

The History of Speed Martin Roach, 2020-10-29 A special treat The pictures and stories combine to provide a rich texture to telling the difficult story of why we chase speed like an addiction Valerie Thompson the world's fastest female motorcycle racer Ever since we built machines that could transport us there has been a desire to find ways to make them go faster For some going faster isn't enough they want to be the fastest This book celebrates those who have built the machines and driven them at ever greater speeds This is The History of Speed Bestselling motorsport writer Martin Roach tells the extraordinary story of those who have come to be obsessed by speed From Camille Jenatton the Red Devil who became the first man to drive at over 100kmh in 1899 through the golden age of Malcolm Campbell and his Bluebird and on to the modern era of jet and rocket propelled cars we have gone faster and faster But this book is not just about these record breakers Roach also looks at the technology the engines and the inventors who helped progress in speed at all levels from Formula One to the supercars from the likes of Ferrari and Mercedes that are eagerly snapped up by collectors rarely to be seen on the road Accompanied by some of the most stunning images of the cars and those who made and drove them Roach tells a wonderful story of innovation and invention He talks to some of the great drivers to find out what inspires them to risk their lives and finds out from engineers how they developed their ideas Along the way we hear some remarkable tale and anecdotes but also find out how the pursuit of speed can also have its costs with many tragic heroes and heroines falling along the way If you've ever thrilled to the roar of a sports car engine or loved the feel of the g force as you accelerate away or even looked on in wonder at a powerful engine The History of Speed is a book that you will not want to miss out on *Dry Goods Merchants Trade Journal*, 1924 **The Bittersweet Science** Carlo Rotella, Michael Ezra, 2017-04-28 Weighing in with a balance of the visceral and the cerebral boxing has attracted writers for millennia Yet few of the writers drawn to it have truly known the sport and most have never been in the ring Moving beyond

the typical sentimentality romanticism or cynicism common to writing on boxing The Bittersweet Science is a collection of essays about boxing by contributors who are not only skilled writers but also have extensive firsthand experience at ringside and in the gym the corner and the ring itself Editors Carlo Rotella and Michael Ezra have assembled a roster of fresh voices ones that expand our understanding of the sport s primal appeal The contributors to The Bittersweet Science journalists fiction writers fight people and more explore the fight world s many aspects considering boxing as both craft and business art form and subculture From manager Charles Farrell s unsentimental defense of fixing fights to former Golden Glover Sarah Deming s complex profile of young Olympian Claressa Shields this collection takes us right into the ring and makes us feel the stories of the people who are drawn to or sometimes stuck in the boxing world We get close up profiles of marquee attractions like Bernard Hopkins and Roy Jones Jr as well as portraits of rising stars and compelling cornermen along with first person hands on accounts from fighters points of view We are schooled in not only how to hit and be hit but why and when to throw in the towel We experience the intimate immediacy of ringside as well as the dim back rooms where the essentials come together And we learn that for every champion there s a regiment of journeymen dabblers and anglers for advantage for every aspiring fighter a veteran in painful decline Collectively the perspectives in The Bittersweet Science offer a powerful in depth picture of boxing bobbing and weaving through the desires delusions and dreams of boxers fans and the cast of managers trainers promoters and hangers on who make up life in and around the ring Contributors Robert Anasi Brin Jonathan Butler Donovan Craig Sarah Deming Michael Ezra Charles Farrell Rafael Garcia Gordon Marino Louis Moore Gary Lee Moser Hamilton Nolan Gabe Oppenheim Carlo Rotella Sam Sheridan and Carl Weingarten
