Hunter-Carsch, Margaret Herrington, 2001-10-22 Recent policy initiatives illuminate the need for greater teacher awareness
about dyslexia in secondary and tertiary education Yet the debates about dyslexia are often narrowly based and can exclude
some teachers This book attempts to open up the debate by bringing together different ways of talking and thinking about
dyslexia Fundamental questions about how to respond to dyslexia in teaching and support contexts are addressed and the
significance of exploratory conversations between learners and tutors is recognised The need to restructure the structured
approach and to consider meta affectivity as well as metacognition is explored Practitioners in both secondary and tertiary

Executive function is an umbrella term for various cognitive processes that are central to goal directed behavior thoughts and emotions These processes are especially important in novel or demanding situations which require a rapid and flexible adjustment of behavior to the changing demands of the environment The development of executive function relies on the maturation of associated brain regions as well as on stimulation in the child s social contexts especially the home and school Over the past decade the term executive function has become a buzzword in the field of education as both researchers and educators underscore the importance of skills like goal setting planning and organizing in academic success Accordingly in initiating this Research Topic and eBook our goal was to provide a forum for state of the art theoretical and empirical work on this that both facilitates communication among researchers from diverse fields and provides a theoretically sound source of information for educators The contributors to this volume who hail from several different countries in Europe and North America have certainly accomplished this goal in their nuanced and cutting edge depictions of the complex links among various executive function components and educational success **Assistive Technology** Alain Pruski, Harry Knops, 2005 Points towards the difficulty encountered in research and development carried out by laboratories to reach the users This book aims at alerting developers so that they pay attention to the outcome of their work Inventive research and technologies which have a high potential in the field of Assistive Technology are described in this publication Development of Orthographic Knowledge and the Foundations of Literacy Shane Templeton, Donald R. Bear, 2013-07-04 This volume unites spelling and word recognition two areas that have largely remained theoretically and empirically distinct Despite considerable advances in the investigation of processes underlying word perception and the acknowledgement of the seminal importance of lexical access in the reading and writing processes to date the development and functioning of orthographic knowledge across both encoding and decoding contexts has rarely been explored The book begins to fill this void by offering a coherent and unified articulation of the perceptual linguistic and cognitive features that characterize an individual s

advancing word orthographic knowledge providing evidence for a common knowledge base underlying spelling in writing and word recognition in reading From a developmental perspective the studies and syntheses presented in this volume blend insights from psychology and language study with those from clinical and classroom observations These insights help explain how individuals from preschool through adolescence develop knowledge of the orthographic system underlying word structure in English and how they apply this knowledge in actual writing and reading contexts Implications are drawn for the assessment and teaching of spelling vocabulary and word analysis from primary through middle grades
