

More Reflections on Spelling

- Do you find yourself relying too much on a spell-checker, and as a result do you miss a common error (such as *there* for *their*)?
- How could you encourage students to use spell-checkers but caution them at the same time?

Spelling Links Reflections On Spelling And Its Place In The Curriculum:

Spelling Links David Booth,1991-01-01 *Why Kids Can't Spell* Roberta Heembrock,2008-08-29 *Why Kids Can't Spell* is a resource reference book for parents and educators who have an interest in and a concern for children's spelling ability. The purpose of this book is to encourage and foster good spelling practices in the home and at school to reflect modern teaching methods. The design of this book uses a scope and sequence format with each chapter building on the previous one. Every chapter includes a discussion on spelling background knowledge. In this section one finds an analysis of children's writing samples in accordance with J. Richard Gentry and Jean Wallace Gillet's Model of Spelling Development. This is followed by numerous inquiry-based, project-based, and generative ideas and activities. The activities in this book are practical and easy to prepare, use readily available materials, and are meant to facilitate readers' understanding. All chapters are related, and therefore the reader is encouraged to browse and borrow from any chapter. The activities may be modified in order to appropriately challenge and meet individual needs. *Invitations* Regie Routman,1994 Encouragement, support, and specifics on putting whole language theory into practice—things that today's educators need. *Invitations* offers all of them, and Routman invites all teachers to reflect upon their teaching. She provides specific strategies for the daily management and educational issues that teachers struggle with in their efforts to make teaching more relevant for their students and themselves.

Beginning to Spell Rebecca Treiman,1992-10-29 This groundbreaking study on the psycholinguistics of spelling presents the author's original empirical research on spelling and supplies the theoretical framework necessary to understand how children's ability to write is related to their ability to speak a language. The author explores areas in a field dominated by work traditionally concerned with the psychodynamics of reading skills, and in so doing highlights the importance of learning to spell for both psycholinguists and educators, since as they begin to spell, children attempt to represent the phonological or sound form of words. The study of children's spelling can shed light on the nature of phonological systems and can illuminate the way sounds are organized into larger units such as syllables and words. Research on children's spelling leads directly to an understanding of the way phonological knowledge is acquired and how phonological systems change with the development of reading and writing ability. In addition to this insight concerning cognitive processes, the findings presented here have implications for how spelling should be taught and why some writing systems are easier to master than others. The work will interest a wide range of cognitive and developmental psychologists, psycholinguists, and educational psychologists, as well as linguists and educators interested in psycholinguistics. **Handbook on the Science of Early Literacy** Sonia Q. Cabell, Susan B. Neuman, Nicole Patton Terry,2024-04-25 Synthesizing the best current knowledge about early literacy, this comprehensive handbook brings together leading researchers from multiple disciplines.
