Tambo Life In An Andean Village:

Tambo Julia Meyerson, 2010-07-05 Perhaps the best way to sharpen one's powers of observation is to be a stranger in a strange land Julia Meyerson was one such stranger during a year in the village of Tambo Peru where her husband was conducting anthropological fieldwork Though sometimes overwhelmed by the differences between Quechua and North American culture she still sought eagerly to understand the lifeways of Tambo and to find her place in the village Her vivid observations recorded in this field journal admirably follow Henry James's advice Try to be one of the people upon whom nothing is lost With an artist's eye Meyerson records the daily life of Tambo the cycles of planting and harvest the round of religious and cultural festivals her tentative beginnings of friendship and understanding with the Tambinos The journal charts her progress from tolerated outsider to accepted friend as she and her husband learn and earn the roles of daughter and son in their adopted family With its wealth of ethnographic detail especially concerning the lives of Andean women Tambo will have great value for students of Latin American anthropology In addition scholars preparing to do fieldwork anywhere will find it a realistic account of both the hardships and the rewards of such study

Life and death of a rural village in Garamantian Times. Archaeological investigations in the oasis of Fewet (Libyan Sahara) Lucia

Mori, 2013-12-01 This volume presents the results of the archaeological investigations in the oasis of Fewet SW Libyan Sahara carried out by the Archaeological Mission in the Sahara of the Sapienza University of Rome Evidences of an ancient rural village were identified under the houses of the modern town of Tan Afella and a large necropolis dated to the Garamantian times spread at the fringes of the modern settlement Until 1997 very little was known on the Garamantian period in the Wadi Tanezzuft area and on the transition from the pastoral to the early historical phase This period witnessed the gradual sedentarisation of human groups in the oases and the development of caravan routes with the flourishing of an intra and trans Saharan trade These processes also influenced by significant alterations in climate which led to the agricultural exploitation of the limited areas where water resources were available the oases were archaeologically unknown as far as settlements were concerned The archaeological surveys and excavations carried out in the area of Fewet were particularly promising and are here analysed in a multidisciplinary perspective which takes into consideration environmental and anthropological studies in the attempt to reconstruct the culture and the life of people inhabiting the Southern Fezzan region in early historical times The historical archaeology of the Sahara remains an underdeveloped field of research especially for the pre Islamic period The most significant exception to this rule has for long concerned the people known as the Garamantes who inhabited the central Saharan region coincident with Libya's south west province Fezzan This volume is a marvelous addition to the small corpus of published research on the Pre Islamic oasis societies of the Sahara and provides a complementary perspective on the world of the Garamantes to the Anglo Libyan work I have directed from their heartlands in the Wadi el Ajal c 400 km to north east of Ghat Prof David J Mattingly University of Leicester UK

The Wayfinders Wade

Davis,2009 Many of us are alarmed by the accelerating rates of extinction of plants and animals But how many of us know that human cultures are going extinct at an even more shocking rate While biologists estimate that 18 percent of mammals and 11 percent of birds are threatened and botanists anticipate the loss of 8 percent of flora anthropologists predict that fully 50 percent of the 7 000 languages spoken around the world today will disappear within our lifetimes And languages are merely the canaries in the coal mine what of the knowledge stories songs and ways of seeing encoded in these voices In *The Wayfinders* Wade Davis offers a gripping and enlightening account of this urgent crisis He leads us on a fascinating tour through a handful of indigenous cultures describing the worldviews they represent and reminding us of the encroaching danger to humankind s survival should they vanish

The Social Life of Numbers Gary Urton,Primitivo Nina Llanos,2010-07-05 Unraveling all the mysteries of the khipu the knotted string device used by the Inka to record both statistical data and narrative accounts of myths histories and genealogies will require an understanding of how number values and relations may have been used to encode information on social familial and political relationships and structures This is the problem Gary Urton tackles in his pathfinding study of the origin meaning and significance of numbers and the philosophical principles underlying the practice of arithmetic among Quechua speaking peoples of the Andes Based on fieldwork in communities around Sucre in south central Bolivia Urton argues that the origin and meaning of numbers were and are conceived of by Quechua speaking peoples in ways similar to their ideas about and formulations of gender age and social relations He also demonstrates that their practice of arithmetic is based on a well articulated body of philosophical principles and values that reflects a continuous attempt to maintain balance harmony and equilibrium in the material social
