Taming Of Chance:

The Taming of Chance Ian Hacking, 1990-08-31 In this important study Ian Hacking continues the enquiry into the origins and development of certain characteristic modes of contemporary thought undertaken in such previous works as the best selling *The Emergence of Probability* Professor Hacking shows how by the late nineteenth century it became possible to think of statistical patterns as explanatory in themselves and to regard the world as not necessarily deterministic in character In the same period the idea of human nature was displaced by a model of normal people with laws of dispersion These two parallel transformations fed into each other so that chance made the world seem less capricious it was legitimated because it brought order out of chaos Combining detailed scientific historical research with characteristic philosophic breadth and verve *The Taming of Chance* brings out the relations between philosophy the physical sciences mathematics and the development of social institutions and provides a unique and authoritative analysis of the probabilisation of the western world

Taming Chance in Education Daniel Pettersson, Andreas Nordin, 2023-10-02 This volume centres the notion of chance in education as a key concept in contemporary education relating to aspects like accountability datafication or international large scale assessments and discusses the impact that the historical desire to tame this notion has had on present day educational policy and practice Encouraging readers to widen their educational imagination chapters combine secondary research from the fields of cybernetics systems thinking and comparative education with issues of control prediction and comparison as ways to tame chance in education Using the theoretical lenses of reasoning notions and addendums for legitimacy to foster a critical awareness of rarely discussed educational matters the book explores how these notions are central to the taming of chance within education Ultimately the authors determine the styles of reasoning that are foundational and frame how we think about and act on education and thereby address one of the top priorities in educational policy politics and practice today This timely book with its unique perspective on the debates around education will be of interest to students researchers and scholars in the fields of education policy and politics international and comparative education and theory of education Those involved with the philosophy of education will also find the book valuable

Politics of Divination Joshua Ramey, 2016-09-26 Since the 2008 financial crisis the neoliberal ideas that arguably caused the damage have been triumphant in presenting themselves as the only possible solution for it How can we account for the persistence of neoliberal hegemony in spite of its obviously disastrous effects upon labor capital ecology and society The argument pursued in this book is that part of the persistence of neoliberalism has to do with the archaic and obscure political theology upon which much of its discourse trades This is a political theology of chance that both underwrites and obscures sacrificial devotion to market outcomes Joshua Ramey structures this political theology around hidden homologies between modern markets as non rational randomizing meta information processors and archaic divination tools which are used in public acts of tradition bound attempts to interpret the deliverances of chance Ramey argues that only by recognizing

the persistently sacred character of chance within putatively secularized discourses of risk and randomness can the investments of neoliberal power be exposed at their sacred source and an alternative political theology be constructed

Chance, Literature, and Culture in Early Modern France John D. Lyons, 2016-04-08 In the Renaissance and early modern periods there were lively controversies over why things happen Central to these debates was the troubling idea that things could simply happen by chance In France a major terrain of this intellectual debate the chance hypothesis engaged writers coming from many different horizons the ancient philosophies of Epicurus the Stoa and Aristotle the renewed reading of the Bible in the wake of the Reformation a fresh emphasis on direct empirical observation of nature and society the revival of dramatic tragedy with its paradoxical theme of the misfortunes that befall relatively good people and growing introspective awareness of the somewhat arbitrary quality of consciousness itself This volume is the first in English to offer a broad cultural and literary view of the field of chance in this period The essays by a distinguished team of scholars from the U S Britain and France cluster around four problems Providence in Question Aesthetics and Poetics of Chance Law and Ethics and Chance and its Remedies Convincing and authoritative this collection articulates a new and rich perspective on the culture of sixteenth and seventeenth century France

Chance, Necessity, Love Leonard M. Hummel, Gayle E. Woloschak, 2017-07-18 What exactly is cancer And where is God and what is love amidst the complex evolutionary development of all cancers In *Chance Necessity Love* An Evolutionary Theology of Cancer Hummel and Woloschak address these questions that arise for many people with cancer and in all who grapple with making meaning of science about cancers In order to do so the authors first clarify new scientific findings about cancer and then offer faithful and wise theological perspectives on these discoveries In doing so they make plain what cannot and can be changed about cancer And in doing so they show how cancer is an evolutionary disease that develops according to the same dynamics of chance that is random occurrences and necessity law like regularities at work in all other evolutionary phenomena Therefore they ask where is God and what is love within the evolutionary chance and necessity operative throughout all aspects of cancer They offer the readers thoughtful responses to this question and many others life death hope acceptance and love given the evolutionary nature of cancer

Biopolitics of Security Michael Dillon, 2015-02-11 Taking its inspiration from Michel Foucault this volume of essays integrates the analysis of security into the study of modern political and cultural theory Explaining how both politics and security are differently problematised by changing accounts of time the work shows how during the course of the 17th century the problematisation of government and rule became newly enframed by a novel account of time and human finitude which it calls factual finitude The correlate of factual finitude is the infinite and the book explains how the problematisation of politics and security became that of securing the infinite government of finite things It then explains how concrete political form was given to factual finitude by a combination of geopolitics and biopolitics Modern sovereignty required the services of biopolitics from the very beginning The essays explain how these politics of security arose at the

same time changed together and have remained closely allied ever since In particular the book explains how biopolitics of security changed in response to the molecularisation and digitalisation of Life and demonstrates how this has given rise to the dangers and contradictions of 21st century security politics This book will be of much interest to students of political and cultural theory critical security studies and International Relations *If Only We Knew* John Willinsky, 2002-05-03 First published in 2000 Routledge is an imprint of Taylor Francis an informa company The Mystery of Reason Paul Haffner, 2001 The Mystery of Reason investigates the enterprise of human thought searching for God People have always found stepping stones to God's existence carved in the world and in the human condition This book examines the classical proofs of God's existence and affirms their continued validity It shows that human thought can connect with God and with other aspects of religious experience Moreover it depicts how Christian faith is reasonable and is neither blind nor naked Without reason belief would degenerate into fundamentalism but without faith human thought can remain stranded on the reef of its own self sufficiency This book proposes that the human mind must be in partnership with the human heart in any quest for God Paul Haffner is lecturer in systematic and dogmatic theology in Rome at the Pontifical Gregorian University the Pontifical Lateran University and the Pontifical Athenaeum Regina Apostolorum In this series he has published The Mystery of Creation The Mystery of Mary and The Sacramental Mystery The Politics of Inquiry Benjamin Baez, Deron Boyles, 2009-01-09 Winner of the 2010 Critics Choice Award presented by the American Educational Studies Association 2009 CHOICE Outstanding Academic Title In The Politics of Inquiry Benjamin Baez and Deron Boyles critique recent trends in education research to argue against the culture of science Using the National Research Council's 2002 report Scientific Research in Education as a point of departure they contend that the entire discourse on education science reflects a number of distinct but mutually constitutive political forces or movements that use science and education to shape what we can think and thus what we can become These forces include the attempts to restrict democracy via scientism the uses of academic classifications for organizing the world into social groups the imperatives of the informational society which seek precision in order to convert the world into data for easy governing and the effects of transnational capitalist exchanges which convert everything into a cost benefit analysis and which make us all complicit in ways we do not fully grasp Baez and Boyles examine these forces and offer an alternative to the current pushes to make educational inquiry scientific **The Cinema of Converging Lives** Lucy Fischer, Distinguished Professor Emerita Film and Media Studies Lucy Fischer, 2025-09-17 What happens when strangers meet in film In this book Lucy Fischer analyzes films by a diverse and international group of directors which portray the seemingly random intersection of separate lives Exploring this important category of the complex film genre she dissects the different narrative forces which bring the characters together and considers the relationship between this genre and rising loneliness and isolation worldwide
