

Learn from the Leaders in Andrology and ART Training:

Since its inception in 2003, our [ART training program](#) has been offering a unique opportunity to learn the latest techniques in routine and advanced andrology along with the full spectrum of embryology-focused technology. In the last 17 years, we have successfully trained over 210 candidates from more than 45 countries. Due to COVID-19 pandemic, we are now pleased to offer our world class ART training course in a new online format. The monthly training will cover 8 different modules in 14 virtual sessions that include routine (manual and automated semen analysis, sperm morphology and other ancillary tests) and advanced tests (sperm DNA fragmentation, seminal oxidation-reduction potential) in andrology as well as all ART-related lab procedures such as: ICSI, assisted hatching, embryo biopsy, PGD, vitrification, sperm preparation and gamete cryopreservation.

Learning Objectives of Module 2

- Advanced sperm function tests
- Sperm DNA fragmentation (SDF) test
- Oxidation reduction potential (ORP) test
- Lab developed tests (LDT) for SDF
- Clinical relevance of SDF in ART

Who Can Apply:

Biologists, laboratory technologists, embryologists, undergrad life science students, andrologists, veterinarians, medical graduates, researchers, scientists, physicians and others with an interest in learning the latest in andrology and embryology lab protocols from practicing andrologists, renowned clinical embryologists as well as IVF and male infertility specialists.

About the Training:

Module 2: Advanced Andrology Techniques
Date: Tuesday, March 9, 2021
Time: 9:00 am – 11:00 am EST

- Attendance is free-of-charge, participants will not incur any course fee
- A new course module will be available monthly
- Certificate of participation is available*

Training Goals:

Learn about the significance of conducting advanced tests for oxidative stress and sperm DNA damage, examine their association with semen parameters and fertility to understand the significance of each test in the management of male infertility.

Educational Tools:

Moderated session with short PowerPoint presentations, video demonstration of lab techniques, Q&A and trouble-shooting advice.

About the Training:

- Simple online registration. [Click here to register](#)
- Submit latest curriculum vitae; color, passport size photograph, copy of valid driver's license for US citizens and passport (or) valid driver's license with picture (or) national identification card with picture for overseas citizens. Email to crm@ccf.org

Each Participant will Receive:

- Key articles
- Clinical guidelines
- Full protocol of lab developed tests

*Certificate of Participation:

Certificates will be issued to those who pass an online multiple choice test, conducted after the course, based on the educational content covered during the virtual course. There will be 50 questions with 4 possible responses and one correct answer. A passing rate of ≥65% will be used as a criteria for the award of the certificate. There will be no negative marking for incorrect answers.

Third Series** Library of Congress. Copyright Office,1979 **Male Fertility and Infertility** T. D. Glover,C. L. R. Barratt,2009-03-19 This contemporary account of male fertility provides a much needed bridge between those seeking to understand the subject from an evolutionary and biological perspective and those with clinical responsibility for the investigation and treatment of infertility Accordingly the first half of the book deals with the evolutionary aspects of male reproduction and sperm competition sperm production and delivery in man and other animals spermatogenesis and epididymal function sperm transport in the female tract and the apparent decline in human sperm count The second part of the book puts greater emphasis on clinical problems and opens with a discussion of intracytoplasmic sperm injection its value and limitations This is followed by a review of modern developments in the genetics of male fertility and proceeds to a further chapter on the role of surgical procedures used in the treatment Semen analysis is critically reviewed and the molecular techniques now being used in preimplantation diagnosis and in the study of mitochondrial inheritance are fully described Taken together these chapters written by an international team of authors illustrate the breadth of vision needed to tackle the problem of male fertility **Disturbances in Male Fertility** K. Temple-Smith,2012-12-06 Impending famine and a terrifying rate of consumption of natural resources are vital issues which have focussed public interest in the ecologic social and political problems of ever increasing overpopulation in many countries of the world As well as the vast material and intellectual expenditure lavished on family planning and birth control the past decade has seen an immense research effort in the elaboration of improved methods of fertility control both for men and for women During the same period however research into the causes of male fertility disorders has proceeded with equal intensity and a number of promising therapeutic

approaches have become the subject of clinical trials The wish of an individual or of a couple to have offspring is an absolute which requires no further justification and there can be few challenges to a physician as essential as the spouses predicament in a childless marriage Only with a special knowledge of the function pathology and pathophysiology of the reproductive system is he properly equipped to meet that challenge **Male Reproductive Function and Semen** T. Mann, C. Lutwak-Mann, 2012-12-06 To present a coherent and meaningful survey of scientific research endeavour in an area that has expanded as fast as physiology and biochemistry of reproduction in the male is no mean task these days No less prodigious than the growth of knowledge of male reproductive function has been the rate at which the outpouring of publications on this subject has continued since the appearance of *The Biochemistry of Semen and of the Male Reproductive Tract* in 1964 Since cyclopaedic treatment of this vast literature did not appeal to us we have made no attempt either to rehash the material contained in that book or to enlarge the bibliography beyond the nearly 3500 references included in the present treatise At the same time whilst writing we felt strongly that to advance it is necessary to understand the past and for this reason we have not hesitated to refer especially in the introductory chapter to a number of those fundamental early discoveries in which today's knowledge is deeply and firmly rooted **Male Infertility** Timothy B. Hargreave, 1983

Treatment of Male Infertility J. Bain, Wolf-Bernhard Schill, L. Schwarzstein, 2012-12-06 Our insight into the mechanisms of the physiology of reproduction has experienced a swift and constant development these last few years The advent of more sophisticated diagnostic methods and their relatively easy clinical application allow for the incorporation of that knowledge into the evaluation of the infertile couple These facts together with an obvious change in social psychology have facilitated the development of different specialities dealing with the problems of infertility It is now possible in medical centers all around the world to undertake a better disposition of the infertile husband to look for advice to be studied and treated Confronted with this situation we are still unable to offer specific therapy in most cases however empirically based therapy abounds Advances in therapy have not kept pace with our increased physiological knowledge and improved diagnostic techniques Pathophysiological mechanisms and etiological factors in male infertility are largely unknown This has significantly hampered both clinical evaluation and advances in treatment allowing for frequent non scientific therapeutic incursions into the armamentarium of the andrologist Several factors have given birth to therapeutic fashions which are bound to survive as long as this state of lack of knowledge continues For example we may ask whether the treatment of varicocele constitutes a fashion Though we accept the treatment of varicocele as the best available treatment of male infertility we do not know its mechanism of action and so we cannot predict a therapeutic result
