Handbook of Theories on Designing Alignment Between People and the Office Environment Rianne

Appel-Meulenbroek,Vitalija Danivska,2021-06-16 Although workplace design and management are gaining more and more attention from modern organizations workplace research is still very fragmented and spread across multiple disciplines in academia There are several books on the market related to workplaces facility management FM and corporate real estate management CREM disciplines but few open up a theoretical and practical discussion across multiple theories from different fields of studies Therefore workplace researchers are not aware of all the angles from which workplace management and effects of workplace design on employees has been or could be studied A lot of knowledge is lost between disciplines and sadly many insights do not reach workplace managers in practice Therefore this new book series is started by associate professor Rianne Appel Meulenbroek Eindhoven University of Technology the Netherlands and postdoc researcher Vitalija Danivska Aalto University Finland as editors published by Routledge It is titled Transdisciplinary Workplace Research and Management because it bundles important research insights from different disciplinary fields and shows its relevance for both academic workplace research and workplace management in practice The books will address the complexity of the transdisciplinary angle necessary to solve ongoing workplace related issues in practice such as knowledge worker productivity office use and more strategic workplace management In addition the editors work towards further collaboration and integration of the necessary disciplines for further development of the workplace field in research and in practice This book series is relevant for workplace experts both in academia and industry This first book in the series focuses on the employee as a user of the work environment The 21 theories discussed and applied to workplace design in this book address people's ability to do their job and thrive in relation to the office workplace Some focus more on explaining why people

behave the way they do the psychosocial environment while others take the physical and or digital workplace quality as a starting point to explain employee outcomes such as health satisfaction and performance They all explain different aspects for achieving employee workplace alignment EWA and thereby ensuring employee thriving The final chapter describes a first step towards integrating these theories into an overall interdisciplinary framework for eventually developing a grand EWA theory The Open Access version of this book available at <http://www.taylorfrancis.com/books/e/9781003128830> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Vanderburg,2005-12-15 From the very beginnings of their existence human beings have distinguished themselves from other animals by not taking immediate experience for granted Everything was symbolized according to its meaning and value a fallen branch from a tree became a lever a tree trunk floating in the river became a canoe Homo logos created communities based on cultures humanity s first megaproject Further symbolization of the human community and its relation to nature led to the possibility of creating societies and civilizations Everything changed as these interposed themselves between the group and nature Homo societas created ways of life able to give meaning direction and purpose to many groups by means of very different cultures humanity s second megaproject What Das Kapital did for the

nineteenth century and La technique did for the twentieth Willem H Vanderburg's *Living in the Labyrinth of Technology* seeks to create for the twenty first century an attempt at understanding the world in a manner not shackled to overspecialized scientific knowing and technical doing Western civilization may well be creating humanity's third megaproject based not on symbolization for making sense of and living in the world but on highly specialized desymbolized knowing stripped of all peripheral understanding Vanderburg focuses on two interdependent forces in his narrative namely people changing technology and technology changing people The latter aspect although rarely considered turns out to be the more critical one for understanding the spectacular successes and failures of contemporary ways of life As technology continues to change the social and physical world the experiences of this world grow people's minds and society's cultures thereby re-creating human life in the image of technology *Living in the Labyrinth of Technology* argues that the twenty first century will be dominated by this pattern unless society intervenes on human as opposed to technical terms *The Skills and Ethics of Professional Touch* Taina Kinnunen, Jaana Parviainen, Annu Haho, 2023-10-25 This book introduces readers to the ethical and goal-oriented functions of touch in professional practice Touch is both an increasingly visible topic today and a core skill in many professions especially in health education and social work This book combines helpful theoretical discussions and practical information offering a balanced and culturally informed introduction to an issue that both students and professionals often find difficult to navigate Chapters discuss the various functions of touch and its uses giving readers a deeper understanding of the potential of tactile work practices The authors offer clear legal and ethical guidance to empower learners They discuss key issues such as harmful touch and the increasing digitisation of patient work Activities case studies and further readings promote learning and help readers reflect on their own relationship to touch This book is an invaluable resource for students in undergraduate and graduate courses in healthcare nursing education and social work and to practitioners looking for guidance on this topic *Finding Focus* Zelana Montminy, 2025-09-16 Your most valuable resource isn't time it's your attention We're living in a constant state of distraction racing through life feeling hollow and disconnected from our loved ones our passions even ourselves The endless noise is numbing and constant digital connection only deepens our isolation We're scrambling to keep up but at what cost The truth is that your mind is wired for focus and you have the power to take it back In *Finding Focus* renowned behavioral scientist Dr Zelana Montminy tackles one of the most critical challenges of our time unveiling a science-backed roadmap for reclaiming your attention not to boost productivity but to reconnect with what truly matters This isn't another set of quick fix tips it's a radical shift in how you engage with the world You'll learn how to Unmask your focus thieves the hidden forces stealing your attention Rebuild mental clarity through nutrition movement and time in nature Rediscover the grounding power of true human connection Craft a personalized focus plan that fits seamlessly into daily life Move from fragmented thoughts to sustained clarity *Finding Focus* is your guide to reclaiming your mind in a world designed to exploit it It's for those who are ready to simplify and reconnect with their

potential and ultimately ready to live fully It s an invitation to step off the treadmill of distraction choose where you direct your attention and shape a life that feels truly your own *Management, Conflict Resolution and Strategy* Magdalena Kraczla, Anna Wziątek-Staśko, 2024-08-02 Managers are key people in building the success of any organization Business results depend on their efficiency in the implementation of the power entrusted to them This efficiency on the other hand largely depends on psychosocial competences and personality predispositions One of the main factors affecting destructively on managers is stress destroying the level of their motivation to work the level of commitment and ultimately resulting in premature professional burnout and a significant reduction in the level of efficiency Ultimately instead of efficient and motivated specialists companies are struggling with employees suffering from depression Exploration of the issue of identifying the sources of stress draws attention to conflict as one of the main research categories that are closely related to the category of stress It is worth emphasizing that this relationship is two way conflict determines the level of stress stress may determine the scale of conflict situations This recommended monograph provides the latest knowledge on what contemporary managers use conflict resolution styles and what strategies they choose to deal with in stressful situations A particular advantage of the study is the presentation of the links between both research categories which are so paramount nowadays The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license Any third party material in this book is not included in the OA Creative Commons license unless indicated otherwise in a credit line to the material Please direct any permissions enquiries to the original rightsholder
