Technological Change In The Korean Electronics Industry Development Centre Studies:

Technological Change in the Korean Electronics Industry Martin Bloom, Organisation for Economic Co-operation and Development. Development Centre, 1992 **Technology Transfer and International Production** Jin W. Cyhn, 2002-03-27 This book analyses the technology development efforts of Korea's electronics industry the country's largest exporter It asks how the Korean electronics industry was able to develop both in terms of production and technology despite low inflows of licensing and foreign direct investments The book argues that the key to its spectacular growth has been through its participation and learning from an inter firm arrangement called original equipment manufacturing arrangement OEM A number of firm level case studies on the Korean electronics industry support this argument The role of the government especially related to its technology policy has also been analysed The government was effective in providing financial incentives for the firms technological upgrading efforts but its supplying of direct technological assistance had limited success Overall this book argues that contrary to many previous studies the role of multinational enterprises has been significant in the development of Korea's electronics industry and that they have acted as a technological tutor for Korea through OEM Participants **The Korean Electronics Industry Under Pressure** Dieter Ernst, 1994 *Korean Businesses: Internal and External Industrialization* Johngseok Bae, Chris Rowley, 2020-05-06 Essays in the book focus on the Korean model of industrialization and internal internationalization organizational capabilities and management roles and disadvantages inherent in the model The subjects covered include corporate catch up strategies foreign investment and future possibilities Technological Capabilities and Export Success in Asia Dieter Ernst, Tom Ganiatsos, Lynn Mytelka, 2003-09-02 What accounts for export success A team of international contributors show that learning and capability formation are critical to sustain competitiveness Through a series of case studies of firms in the textile and garment and electronics industries of five Asian economies Korea Taiwan Thailand Indonesia and Vietnam Technological Capabilities and Export Success in Asia demonstrates that cheap labour combined with currency devaluation is no longer sufficient for export success *Global Production Networking and Technological Change in East Asia* Shahid Yusuf, M. Anjum Altaf, Kaoru Nabeshima, 2004-07-01 In the coming decades East Asian economies must face the challenges of an increasingly globalized marketplace This book explores the changing parameters of competition in East Asia and argues that success ultimately will depend on the ability of the region's firms to harness the potential of global production networks and to build their own innovative capability Presenting the latest findings on global production networks and the evolution of technological capabilities it provides researchers students and policymakers with in depth information and analysis on key issues related to growth and development in East Asia East Asian firms must not only achieve greater efficiency but also become more innovative offering differentiated products in order to vie with other first tier suppliers of multinational corporations These firms will also need to develop a technological edge if they are to compete with corporations from the leading OECD

countries and form their own global production networks Global Production Networking and Technological Change in East Asia argues that a development strategy linked to technological advance will be necessary to foster the growth of innovative national firms that can remain competitive in global markets

Transforming Urban Economies Andrea Colantonio, Richard Burdett, Philipp Rode, 2013-08-15 Cities house the majority of the world's population and are the dynamic centres of 21st century life at the heart of economic social and environmental change They are still beset by difficult problems but often demonstrate resilience in the face of regional and national economic decline Faced by the combined threats of globalisation and world recession cities and their metropolitan regions have had to fight hard to maintain their global competitiveness and protect the quality of life of urban residents Transforming Urban Economies Policy Lessons from European and Asian Cities the first in an ongoing series of research volumes by LSE Cities provides insights in how cities can respond positively to these challenges The fine grained and authoritative analysis of how Barcelona Turin Munich and Seoul have been transformed in the last 20 years examines comparative patterns of decline adaptation and recovery of cities that have successfully managed to transform their economies in the face of economic hardship This in depth and practical analysis is aimed at urban leaders designers planners policymakers and scholars who want to understand the dynamics of economic resilience while cities are still suffering from the aftershocks of the 2008 recession The book highlights the importance of aligned and multi level governance the need for strategic public investments and the role of the private sector universities and foundations in leading and guiding complex processes of urban recovery in an increasingly uncertain age

The East Asian Miracle and Information Technology Nagy Hanna, 1996 World Bank Discussion Paper No 326 Draws on the successful experiences of five East Asian economies Japan the Republic of Korea Singapore Taiwan China and Hong Kong to show how they have exploited the opportunities made possible by the information technology revolution and built sustainable competitive advantages in many high value added industries and services The study examines the role of government in unleashing private sector response promoting the information technology industry diffusing technology and focusing resources on strategic elements of the national information infrastructure It also explores the role of the private sector in influencing the development and use of the new technologies

Economic Governance and the Challenge of Flexibility in East Asia Frederic C. Deyo, Richard F. Doner, Eric Hershberg, 2001 This book analyzes the institutional underpinnings of East Asia's dynamic growth by exploring the interplay between governance and flexibility As the challenges of promoting and sustaining economic growth become ever more complex firms in both advanced and industrializing countries face constant pressures for change from markets and technology Globalization heightened competition and shorter product cycles mean that markets are increasingly volatile and fragmented To contend with demands for higher quality quicker delivery and cost efficiencies firms must enhance their capability to innovate and diversify Achieving this flexibility in turn often requires new forms of governance arrangements that facilitate the exchange of resources among diverse yet

interdependent economic actors Moving beyond the literature's emphasis on developed economies this volume emphasizes the relevance of the links between governance and flexibility for understanding East Asia's explosive economic growth over the past quarter century In case studies that encompass a variety of key industrial sectors and countries the contributors emphasize the importance of network patterns of governance for facilitating flexibility in firms throughout the region Their analyses illuminate both the strengths and limitations of recent growth strategies and offer insights into prospects for continued expansion in the wake of the East Asian economic crisis of the late 1990s Contributions by Richard P Appelbaum Lu lin Cheng Stephen W K Chiu Frederic C Deyo Richard F Doner Dieter Ernst Eric Hershberg Tai Lok Lui Rajah Rasiah David A Smith and Poh Kam Wong Technology, Globalisation and Economic Performance Daniele Archibugi, Jonathan Michie, 1997-03-20 This book studies the link between technological change and country specific performance *New Multinational Enterprises from Korea and Taiwan* Roger van Hoesel, 2013-01-11 This volume represents the first substantive study of emerging multinationals MNEs from Asian economies drawing on the unique experiences of South Korea and Taiwan Combining an econometric investigation with detailed case studies of leading Korean and Taiwanese electronics companies it aims to demystify the nature and theoretical implications of these dynamic economic regions The author argues that many of these new multinationals do not possess the characteristics typically ascribed to MNEs such as technological leadership strong marketing positions or advanced managerial capabilities This is highlighted by documentation of recent developments in outward investment from Korea and Taiwan at both micro and macro level The implications of the recent Asian crisis for the internationalization of Korean and Taiwanese firms are also explored *Technology, Learning, and Innovation* Linsu Kim, Richard R. Nelson, 2000-07-24 In this volume published in 2000 leading scholars analyze in a series of essays and commentaries how newly industrializing countries NICs particularly those in East Asia have transformed themselves from technologically backward and poor to relatively modern and affluent economies over the past thirty years The contributors provide interesting theoretical perspectives and offer insights into the process of technological progress at both the macro and micro levels in these countries The essays review how firms particularly those in electronics and automobiles have dynamically accumulated technological capabilities at the micro level how public policies have shaped the process of technological progress at the national level and what problems some of these countries face today at both levels In addition the volume provides a comparison of East Asian NICs with their Latin American counterparts The discussion also offers useful lessons for policies in other developing countries *Development Centre Studies Competition, Innovation and Competitiveness in Developing Countries* Krieger Mytelka Lynn, 1999-08-26 This book therefore opens a fresh debate on the industrial policies which developing countries need to adopt in order to compete and grow in a globalised economic environment **The Oxford Handbook of Information and Communication Technologies** Robin Mansell, 2007 The production and consumption of information and communication technologies or ICTs are becoming deeply embedded within

our societies The influence and implications of this have an impact at a macro level in the way our governments economies and businesses operate and at a micro level in our everyday lives This handbook is about the many challenges presented by ICTs It sets out an intellectual agenda that examines the implications of ICTs for individuals organizations democracy and the economy Explicitly interdisciplinary and combining empirical research with theoretical work it is organised around four themes covering the knowledge economy organizational dynamics strategy and design governance and democracy and culture community and new media literacies It provides a comprehensive resource for those working in the social sciences and in the physical sciences and engineering fields with leading contemporary research informed principally by the disciplines of anthropology economics philosophy politics and sociology

Korea's Growth and Industrial Transformation H. Lim, 1998-08-19 This book seeks to explore the role of domestic politics in the selection of industrial policy and the different patterns of industrial transformation in East Asia The approach taken in this book partly draws on earlier studies of industrial transformation product cycle theory and statist theory but combines and complements them by emphasizing the role of coalition in industrial policy and industrial transformation

The Economics of Technology Transfer Sanjaya Lall, 2001 This is a selection of articles in the field of technology transfer The volume focuses on issues facing developing countries in the context of rapid technical change globalization of production and the international spread of innovation

Cooperation, Technology, And Japanese Development Donna L Doane, 2018-02-19 This book discusses a detailed study of the evolution and recent forms of cooperative technological ties in Japan It explores the use of cooperative ties for technological advance during the period of technological catch up specifically within a late development context

Interpreting East Asian Growth and Innovation H. Khan, 2004-02-09 Haider A Khan goes beyond the study of catch up technology and raises the question of innovation processes that are the key to the future growth and prosperity of the East Asian economies This is particularly important in the aftermath of the Asian financial crises that have cost these economies much How can newly industrialized economies achieve cohesive systems of innovation for sustainable growth The author offers a novel theory of innovation systems with concrete case studies to illustrate its usefulness

Competing in the Electronics Industry Dieter Ernst, David O'Connor, 1992

Technological Innovation and Third World Multinationals Paz Estrella Tolentino, 2003-09-02 This examines the relationship between technological growth and outward direct investment from firms in Asia and Latin America which has become increasingly significant as these countries develop
