Architectural Design and CAD Yvon Gardan,2012-12-06 In any business the essential element for the successful use of data processing is training This represents the largest expense both at start up and as CAD impacts design office procedures other than drafting Training is also the most difficult cost item to quantify Even more than the equip ment training or retraining in the case of professionals in practice is the key to increased productivity Recommendations for specific programs of training are beyond the scope of this paper Once staff has been retrained to work at higher levels of productivity with data processing equipment they are more valuable They will be more difficult to replace Their new capabilities represent a significant invest ment in modernization both to the individual design office and to the design profession as a whole There is a shortage of qualified people with both professional and computer skills Competition

among employers for people with these skills already exists and will probably continue into the foreseeable future. At the outset of training an employment agreement is worth considering for the well-being of all parties. Advanced Seminar Japanese Craft & Construction, 2001
