

# How Schools Can Maximize Federal Funding to Build a Future-Ready Technology Infrastructure

A massive influx of federal funding over the last two years has dramatically changed education IT, giving schools money to invest in connectivity and software-as-a-service (SaaS) learning solutions and platforms.

Despite this significant increase in federal aid, schools still face challenges maximizing the use of this money and, in some cases, accessing it. A recent Center for Digital Education (CDE) survey of education officials finds many schools face ongoing funding hurdles, including lack of knowledge about available federal funding sources, difficulty applying for grants and challenges understanding allowable uses for federal funding.

The root cause of most of these issues is limited resources and time, as many smaller school districts and colleges lack additional money or dedicated grant writers to collect information and complete funding applications. Schools also need a better plan for identifying where to deploy federal funding and how to put this aid to its best use.

Several strategies — from investing in integrated cloud-based solutions to leveraging innovative procurement models and managed services — can help schools take full advantage of federal funding to drive IT modernization, improve their operational efficiency and deliver better student outcomes.

## Capitalizing on Federal Funding: Current Challenges and Opportunities

The CDE survey of 85 education leaders across the country was conducted in March 2022. It found schools face five major funding challenges:

1. **Confusion over available funding:** 44% of respondents said their institutions often don't understand what funding is available from the federal government.
2. **Time and resource constraints:** 33% said their schools have difficulty applying for grants and developing proposals.
